Engineering Mario Paz,2012-12-06 The subject of earthquake engineering has been the focus of my teaching and research
for many years Thus when Mario Paz the editor of this handbook asked me to write a Foreword I was interested and honored
by his request Worldwide people are beginning to understand the severity of the danger to present and future generations
caused by the destruction of the environment Earthquakes pose a similar threat thus the proper use of methods for
earthquake resistant design and construction is vitally important for countries that are at high risk of being subjected to
strong motion earthquakes Most seismic activity is the result of tectonic earthquakes Tectonic earthquakes are very special
events in that although they occur frequently their probability of becoming natural hazards for a specific urban area is very
small When a severe earthquake does occur near an urban area however its consequences are very large in terms of
