## Reality #1

99% of the threats are automated already, and there is an unofficial "market" that allows you to buy access, data, etc

## Reality #2

99% of the security depends on people like engineers who can easily pick this knowledge for free

## Reality #3

It's true only for governments and targets where the cost of attacks is not important. For the rest of businesses, it's about how much they should spend to hack you

## Reality #4
