Object-oriented Languages & Systems ,1990 Methods and Associated Tools for the Information Systems Life Cycle A.
A. Verrijn Stuart,T. William Olle,1994 In the early days of methods the distinction between the process and the product was
unclear Sometimes consideration was concentrated on the problems of what models should be formulated at other times on
how such results were to be achieved The methods and tools as the two factors became known enjoyed increasing attention
over the years though emphasis now as then is almost always placed on the outcome rather than on the ways towards it This
publication explores methods and associated tools in the perspective of the information systems life cycle It discusses the
need for method flexibility within a design base of certain strict standards and with respect given to the potential
harmonization of existing methods The contribution of a broad range of specialists ensures that papers extend across the
various facets of the discipline *Ninth Working Conference on Reverse Engineering* Arie van der Dussen,Elizabeth
