Automata, Languages and Programming, 1983 **Miscommunications** Timothy Barker, Maria

Korolkova, 2021-01-14 What happens when communication breaks down Is it the condition for mistakes and errors that is characteristic of digital culture And if mistakes and errors have a certain power what stands behind it To address these questions this collection assembles a range of cutting edge philosophical socio political art historical and media theoretical inquiries that address contemporary culture as a terrain of miscommunication If the period since the industrial revolution can be thought of as marked by the realisation of the possibilities for global communication in terms of the telephone telegraph television and finally the internet Miscommunications shows that to think about the contemporary historical moment a new history and theory of these devices needs to be written one which illustrates the emergence of the current cultures of miscommunication and the powers of the false The essays in the book chart the new conditions for discourse in the 21st century and collectively show how studies of communication can be refigured when we focus on the capacity for errors accidents mistakes malfunctions and both intentional and non intentional miscommunications **Forthcoming**

Book Review Index Dana Ferguson, 2001 *Strictness Analysis of Lazy Functional Programs* Peter N. Benton, 1993 We also consider extending the logic with disjunction We then describe how to extend the simply typed lambda calculus with lazy algebraic datatypes A new construction of lattices of strictness properties of such datatypes is described This arises from the characterisation of the solutions to the recursive domain equations associated with these types as initial algebras Next we consider first order ML style polymorphism and show how Wadler's theorems for free parametricity results may be obtained from a simple extension of the semantics of the monomorphic language We then prove a polymorphic invariance result
