Advanced Statistical Methods For The Analysis Of Large Data Sets:

Advanced Statistical Methods for the Analysis of Large Data-Sets Agostino Di Ciaccio, Mauro Coli, Jose Miguel Angulo Ibanez, 2012-03-05 The theme of the meeting was Statistical Methods for the Analysis of Large Data Sets In recent years there has been increasing interest in this subject in fact a huge quantity of information is often available but standard statistical techniques are usually not well suited to managing this kind of data The conference serves as an important meeting point for European researchers working on this topic and a number of European statistical societies participated in the organization of the event The book includes 45 papers from a selection of the 156 papers accepted for presentation and discussed at the conference on Advanced Statistical Methods for the Analysis of Large Data sets *Advanced Statistical Methods for the Analysis of Large Data-Sets* Agostino Di Ciaccio, Mauro Coli, Jose Miguel Angulo Ibanez, 2012-03-14 The theme of the meeting was Statistical Methods for the Analysis of Large Data Sets In recent years there has been increasing interest in this subject in fact a huge quantity of information is often available but standard statistical techniques are usually not well suited to managing this kind of data The conference serves as an important meeting point for European researchers working on this topic and a number of European statistical societies participated in the organization of the event The book includes 45 papers from a selection of the 156 papers accepted for presentation and discussed at the conference on Advanced Statistical Methods for the Analysis of Large Data sets Advanced Statistical Methods for the Analysis of Large Data-Sets Agostino Di Ciaccio, Mauro Coli, Jose Miguel Angulo Ibanez, 2012-03-14 The theme of the meeting was Statistical Methods for the Analysis of Large Data Sets In recent years there has been increasing interest in this subject in fact a huge quantity of information is often available but standard statistical techniques are usually not well suited to managing this kind of data The conference serves as an important meeting point for European researchers working on this topic and a number of European statistical societies participated in the organization of the event The book includes 45 papers from a selection of the 156 papers accepted for presentation and discussed at the conference on Advanced Statistical Methods for the Analysis of Large Data sets **Advanced Statistical Methods in Data Science** Ding-Geng Chen, Jiahua Chen, Xuewen Lu, Grace Y. Yi, Hao Yu, 2016-11-30 This book gathers invited presentations from the 2nd Symposium of the ICSA CANADA Chapter held at the University of Calgary from August 4 6 2015 The aim of this Symposium was to promote advanced statistical methods in big data sciences and to allow researchers to exchange ideas on statistics and data science and to embrace the challenges and opportunities of statistics and data science in the modern world It addresses diverse themes in advanced statistical analysis in big data sciences including methods for administrative data analysis survival data analysis missing data analysis high dimensional and genetic data analysis longitudinal and functional data analysis the design and analysis of studies with response dependent and multi phase designs time series and robust statistics statistical inference based on likelihood empirical likelihood and estimating functions The editorial group selected 14 high quality presentations from this successful

symposium and invited the presenters to prepare a full chapter for this book in order to disseminate the findings and promote further research collaborations in this area This timely book offers new methods that impact advanced statistical model development in big data sciences *Social Research Methods* Sigmund Gronmo,2023-11-22 Framing research as the process of asking and answering questions this book demonstrates how to identify good research questions and how to structure and explore them successfully Whether you are just beginning your research journey or are a seasoned traveller it helps you Decide what you want to achieve with your research Know what options you have to explore your goals Navigate the nuances of different research approaches Understand the decisions of other researchers Choose what path best suits your project Through real life examples demonstrating different types of research the book introduces qualitative quantitative and mixed methods approaches so you can compare different methods at every stage of the research process from initial idea and design to data collection and analysis This new edition includes new chapters on collecting and analysing mixed methods data and additional content on qualitative data analysis New examples reflect the cultural and global diversity of social research and extra visual aids and summaries support understanding of key research concepts and stages The book is accompanied by an online teaching guide including videos additional case studies annotated articles and critical thinking exercises **Computational and Statistical Methods for Analysing Big Data with Applications** Shen Liu,James Mcgree,Zongyuan Ge,Yang Xie,2015-11-20 Due to the scale and complexity of data sets currently being collected in areas such as health transportation environmental science engineering information technology business and finance modern quantitative analysts are seeking improved and appropriate computational and statistical methods to explore model and draw inferences from big data This book aims to introduce suitable approaches for such endeavours providing applications and case studies for the purpose of demonstration Computational and Statistical Methods for Analysing Big Data with Applications starts with an overview of the era of big data It then goes onto explain the computational and statistical methods which have been commonly applied in the big data revolution For each of these methods an example is provided as a guide to its application Five case studies are presented next focusing on computer vision with massive training data spatial data analysis advanced experimental design methods for big data big data in clinical medicine and analysing data collected from mobile devices respectively The book concludes with some final thoughts and suggested areas for future research in big data Advanced computational and statistical methodologies for analysing big data are developed Experimental design methodologies are described and implemented to make the analysis of big data more computationally tractable Case studies are discussed to demonstrate the implementation of the developed methods Five high impact areas of application are studied computer vision geosciences commerce healthcare and transportation Computing code programs are provided where appropriate *Advanced Parallel Processing Technologies* Jiannong Cao,2005-10-21 This book constitutes the refereed proceedings of the 6th International Workshop on Advanced Parallel Processing Technologies APPT 2005 held in Hong Kong

China in September 2005 The 55 revised full papers presented were carefully reviewed and selected from over 220 submissions All current aspects in parallel and distributed computing are addressed ranging from hardware and software issues to algorithmic aspects and advanced applications The papers are organized in topical sections on architecture algorithm and theory system and software grid computing networking and applied technologies **University of Colorado at Denver Catalog** University of Colorado at Denver,2009 Memoirs of the Institute of Scientific and Industrial Research, Osaka University Ōsaka Daigaku.
