Advanced Information Systems Engineering Anne Persson, Janis Stirna, 2004-08-18 th CAiSE 2004 was the 16 in the series of International Conferences on Advanced Information Systems Engineering In the year 2004 the conference was hosted by the Faculty of Computer Science and Information Technology Riga Technical University Latvia Since the late 1980s the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering The conference theme of CAiSE 2004 was Knowledge and Model Driven Information Systems Engineering for Networked Organizations Modern businesses and IT systems are facing an ever more complex environment characterized by

openness variety and change Organizations are coming less self sufficient and increasingly dependent on business partners and other actors These trends call for openness of business as well as IT systems i e the ability to connect and interoperate with other systems Furthermore organizations are experiencing ever more variety in their business in all conceivable dimensions The different competencies required by the workforce are multiplying In the same way the variety in technology is overwhelming with a multitude of languages platforms devices standards and products Moreover organizations need to manage an environment that is constantly changing and where lead times product life cycles and partner relationships are shortening The demand of having to constantly adapt IT to changing technologies and business practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years such as autonomic computing component and services marketplaces and dynamically generated software

files and tertiary storage *Advanced Information Systems Engineering* ,2004 **A Rigorous Semantics for BPMN 2.0 Process Diagrams** Felix Kossak,Christa Illibauer,Verena Geist,Jan Kubovy,Christine Natschläger,Thomas Ziebermayr,Theodorich Kopetzky,Bernhard Freudenthaler,Klaus-Dieter Schewe,2015-02-04 This book provides the most complete formal specification of the semantics of the Business Process Model and Notation 2.0 standard BPMN available to date in a style that is easily understandable for a wide range of readers not only for experts in formal methods but e.g. also for developers of modeling tools software architects or graduate students specializing in business process management BPMN issued by the Object Management Group is a widely used standard for business process modeling However major drawbacks of BPMN include its limited support for organizational modeling its only implicit expression of modalities and its lack of integrated user interaction and data modeling Further in many cases the syntactical and in particular semantic definitions of BPMN are inaccurate incomplete or inconsistent The book addresses concrete issues concerning the execution semantics of business processes and provides a formal definition of BPMN process diagrams which can serve as a sound basis for further extensions i.e. in the form of horizontal refinements of the core language To this end the Abstract State Machine (ASM) method is used to formalize the semantics of BPMN ASMs have demonstrated their value in various domains e.g. specifying the semantics of programming or modeling languages verifying the specification of the Java Virtual Machine or formalizing the ITIL change management process This kind of improvement promotes more consistency in the interpretation of comprehensive models as well as real exchangeability of models between different tools In the outlook at the end of the book the authors conclude with proposing extensions that address actor modeling including an intuitive way to denote permissions and obligations integration of user centric views a refined communication concept and data integration *Advanced Quality Systems* ,2006 **Service-Oriented Computing -- ICSOC 2003** Maria E. Orłowska,2003-12-03 This book constitutes the refereed proceedings of the First International Conference on Service Oriented Computing ICSOC 2003 held in Trento Italy in December 2003 The 38 revised full papers presented were carefully reviewed and selected from 181 submissions The papers are organized in topical sections on service description service composition quality of service models service personalization service semantics business processes and transactions business collaborations service request and coordination service security and reliability infrastructure for service delivery service P2P and grid computing service and mobile computing and service computing and applications **Syllabus** ,1994 **Proceedings of the ...
