## KEY CONCEPTS

- 1.1 The study of life reveals unifying themes. p. 3
- 1.2 The Core Theme: Evolution accounts for the unity and diversity of life. p. 11
- 1.3 In studying nature, scientists form and test hypotheses. p. 16
- 1.4 Science benefits from a cooperative approach and diverse viewpoints. p. 22

### Study Tip

**Make a table:** List the five unifying themes of biology across the top. Enter at least three examples of each theme as you read this chapter. One example is filled in for you. To help you focus on these big ideas, continue adding examples throughout your study of biology.

**Figure 1.1** The light, dappled color of this beach mouse (*Peromyscus polionotus*) allows it to blend into its habitat—brilliant white sand dunes dotted with sparse clumps of beach grass along the Florida seashore. Mice of the same species that inhabit nearby inland areas are much darker, blending with the soil and vegetation where they live.

### How do these mice illustrate the unifying themes of biology?

Beach mouse

Inland mouse

As a result of **evolution** through natural selection over long periods of time, the fur colors of these two populations of mice resemble their surroundings, providing protection from predators.

Structure fits function at all levels of a mouse's **organization**.

Genetic **information** encoded in DNA determines a mouse's fur colors.

**Energy** flows one way from the sun to plants to a mouse; **matter** cycles between a mouse and its environment.

A plant being eaten by a mouse and a mouse being preyed upon by a hawk are **interactions** within a system.
