[Hydroponics Cannabis: A Guide to Hydroponics Method of Cultivating Marijuana](#) Dr Karl Burmer,2019-03-24 Hydroponic farming is a method of growing plants using mineral nutrient solutions in water without soil The hydroponic gardener regulates the composition of nutrients in the liquid solution used to water the plants He She also regulates the frequency of supplying the nutrients to the plants Simply the hydroponic gardener controls the growing environment of the plants The system is highly automated of course but still requires to be well managed As stated above the process is managed not simply controlled Therefore it is water efficient and nutrient efficient both of which are delivered directly to the plant s root structure Because the levels of water and nutrients are monitored these elements are supplied as and when needed at the required levels Together water and nutrients contribute to the success of and rate of growth The lighting factor is also critical in crop production This is achieved by planting out in vertical structures where lighting is maximized while plant density crowding and shading are minimized Present day hydroponic farming embrace the 3 D approach and are grown vertically in multilevel growing beds So now we have ideal growing conditions in terms of nutrients water and light plus the ability to grow in the vertical This adds significantly to the yield per unit area as the growing area is no longer 2 dimensional 2 D but has become a 3 D concept and design This maximizes the actual growing area and uses what could have been unutilized areas in enclosed gardening environments With a multi level bedding structure that is movable plants can now be exposed to ideal lighting at all times throughout the growing period This controlled and managed growing environment also has significant advantages over traditional farming techniques

Hydroponics Cannabis: The Complete Guide on How to Grow Cannabis Indoor and Outdoor Ferdinand H. Quinones MD, 2019-02-08 Hydroponics is the art of growing plants without soil When most people think of growing marijuana hydroponically they think of growing their plants with their roots suspended directly into water with absolutely no growing medium However this is only one type of hydroponic growing There are several variations including growing your plant in a soilless medium such as perlite coco coir and then watering your plants every day which is not very different from growing in soil The debate over cannabis growing mediums is not likely to end soon With all the information available it can be hard to make this decision regarding your own grow op We're here to help you choose With the continuous momentum of cannabis legalization a lot of people are starting to take a swing at growing cannabis Smoking your own home grown bud is one of the most gratifying experiences a stoner can have But when starting out most people don't know where to begin In this article we'll be covering hydroponic vs soil based growing operations This will help the inexperienced and even the experienced grower decide on the correct medium for their next grow In 2017 when we talk about soil vs hydro plantations we're usually referring to indoor vs outdoor growing This is because indoor mediums are rarely 100% soil People tend to use substrates like coco coir and rockwool which are soilless mixtures Most fully soil operations out there will be found in outdoor plantations The advantage to growing hydroponically is that you deliver all the nutrients the plant needs right to its roots In soil the roots have to seek out and extract all nutrients but with hydroponics you take the work out of finding nutrients so the plant can focus more of its energy on growing bud and

making flowers buds Therefore you will end up with much faster growth and higher yields than if you grew your marijuana plants in soil Hydroponics can be very simple or very complex depending on your set up I recommend with starting with a method that is on the simple side and then trying a more complex method once you have a little experience under your belt
