confidence more generally However growth picked up somewhat in 2016 standing at 1% 1.4% and 1.3% in the first second
and third quarters of the year respectively and is expected to maintain this upward trend in 2017 supported by greater
export competitiveness Moves to bolster the economy through reforms such as the new investment law and plans to tackle
wider structural issues are likely to help to raise growth to higher levels than those witnessed in recent years as should the
improvement in security since the 2015 attacks though the extent of this will depend in part on whether or not the economy
of the country's main export destination and tourism source market the eurozone can emerge from its own recent slowdown
