Epstein, 2018 The essays in this book describe and analyze the current contours of the international financial system covering both developed and developing countries and focusing on the ways in which the current international financial system structures and is affected by profound inequalities in the international system This keen analysis of key topics in international finance takes a heterodox perspective with focus on the role of inequalities in power in shaping the structure and outcomes in the international sphere [Global Strategic Management](#) Philippe Lasserre, Felipe Monteiro, 2022-11-03 Seamlessly blending academic rigour and practicality this textbook provides an introduction to global business strategy Assuming a born global perspective Global Strategic Management is supported by ample pedagogical features including numerous case studies and examples featuring both established multinationals and unknown SMEs from across the globe The book takes an applied approach to global business strategy emphasising functional parts of international business managing marketing operations HR and finance The text has been widely updated to incorporate the impacts of the Covid 19 pandemic such as work from anywhere and deglobalization New to this fifth edition is increased material on sustainability and corporate social responsibility including discussion of climate change NGOs and sustainable development goals Subjects such as the impact of technology cryptocurrency and global strategy in the digital space are discussed in more detail while the conflict in Ukraine is also considered **Capital Claims: Power and Global Finance** Benjamin Braun, Kai Koddenbrock, 2022-12-23 Capital Claims Power and Global Finance analyses how global financialized capitalism operates and reproduces itself exploring the remarkable ability of the

financial sector to maintain its dominance through even the most severe economic crises The book defines international financialization as a process by which the number and value the tradability and the enforceability of cross border financial claims increase and are successfully defended against competing social or political agendas By focusing on financial claims the volume develops a conceptual toolkit for the study of the political economy of global finance and the inequalities it sustains The book brings together leading researchers whose work is geared towards opening the black box of cross border finance The authors suggest shifting the analytical focus from capital flows to capital claims credit debt relations between identifiable actors embedded in social and political institutions and infused with power and hierarchy They show how financial actors wield leverage power infrastructural power and enforcement power both vis vis other private actors and vis vis the state This book will be of great interest to students teachers and researchers of international political economy critical political economy and international relations as well as those in the fields of finance capitalism studies activism policymaking and advocacy An Online Appendix for Chapter 11 is available at www.routledge.com/9781032111193

Emerging Economies and the Global Financial System Bruno Bonizzi, Annina Kaltenbrunner, Raquel A. Ramos, 2021-05-04 This book provides a comprehensive overview of the financial integration of emerging economies through an in depth analysis of the international monetary system how it impacts capital flows and exchange rates and its implications for policy making The financial integration of emerging economies has been a remarkable development of the past two decades The growth of cross border transactions and asset ownership not least through the accumulation of foreign exchange reserves has put many of these countries in a more prominent if still peripheral position within the global financial system This has not been a smooth process as integration has been marked by cyclical waves of capital flows with financial and currency instability often accompanying the acute phases of these cycles While conventional economic theory traditionally sees financial integration as a positive development Post Keynesian economists working in the tradition of Keynes Minsky and Kalecki have long taken a more sceptical viewpoint By centring the analysis of financial dynamics on concepts as liquidity uncertainty balance sheet structures and institutions Post Keynesian theory highlights the intrinsic character of shocks imposed by financial integration upon emerging economies and their implications for economic growth and distribution This book demonstrates that these analyses can be fruitfully used to gain a better understanding of financial in stability and economic development in emerging economies as they integrate into the global financial system This work provides key reading for students and scholars of economics political economy and finance that are interested in the financial integration of emerging economies and how the heterodox tradition of Post Keynesian economics contributes to its analysis **I for Impact: Blending Islamic Finance and Impact Investing for the Global Goals** United Nations Development Programme Istanbul International Center for Private Sector in Development (UNDP IICPSD), Islamic Development Bank Islamic Research and Training Institute (IRTI), 2017-05-15 The 2030 Agenda for Sustainable Development offers a masterplan

to create a better world for the people and the planet. Its scale and ambition however requires new development partnerships supported by adequate financial and technical resources. As a response, development practitioners started to explore alternative and complementary innovative instruments to finance the SDGs, one of which is the prospects for increased cooperation and coordination between Islamic finance and impact investing. To date however, the academic and development literature has lacked a systematic exploration of this promising collaboration between Islamic finance and impact investing. This present study attempts to fill this gap by developing the first knowledge product to increase awareness on this collaboration. I for Impact attempts to raise awareness on the compatibility between Islamic finance and impact investing. It reviews recent developments and key factors for growth, pinpoints similarities between the two sectors and makes policy recommendations for development actors to create the conditions for the two sectors to benefit from each other.

Hong Kong's Global Financial Centre and China's Development Yan-leung Cheung, Yuk-shing Cheng, Chi-keung Woo, 2016-12-08. This book provides an overview of Hong Kong's role as an international financial centre, focusing especially on how Hong Kong has contributed significantly and continues to contribute significantly to China's economic development. It considers the importance of Hong Kong's stock market in raising finance for Chinese companies, explores the potential of Hong Kong as an offshore financial centre and discusses recent regulatory reforms. It concludes by assessing the prospects for Hong Kong's continuing success as a global financial centre and puts forward recommendations for policies which would help secure continuing success.

International Finance and Development Jose Antonio Ocampo, Jan Kregel, Stephany Griffith-Jones, 2007. International Finance and Development offers a comprehensive survey of the major financing issues influencing economic development since the historic Monterrey Consensus of the International Conference on Financing for Development in 2002. As most recent international private capital flows have been unlikely to significantly enhance new productive investments in the developing countries, it is necessary to design appropriate mechanisms to ensure they contribute to development. However, recent trends in official development financing offer some grounds for optimism, although much more needs to be done. External debt problems of many developing countries, especially the least developed countries, seem likely to continue to constrain their prospects for development. The final part on systemic issues highlights new concerns and the modest progress in ensuring that the international monetary and financial system better serves economic growth and development throughout the world, especially in the developing countries.

The Macroeconomic Management of Foreign Aid Mr. Peter Isard, 2006-04-21. Since the adoption of the Millennium Development Goals (MDGs) in 2000, the challenge of reducing poverty around the world has been more prominent on the agenda of the international community. Relatively slow progress toward meeting the MDGs by the 2015 target date has added to the urgency of this effort. Two influential reports, The United Nations Millennium Project Report, the Sachs Report, and the Commission for Africa Report, the Blair Report, envisage substantial increases in aid flows to poor countries, especially to countries in sub-Saharan Africa. The international community sees increases in aid along with improvements in recipient policies and freer global trade as necessary for global prosperity and poverty reduction.
