## **Introduction To Environmental Economics Nagoya University:**

**Empirical Research on Environmental Policies in China** Kiyoshi Fujikawa,2024-01-08 This book presents an empirical study of the effects of environmental policies on China and its neighboring countries with a focus on waste and climate policies in China The two major carbon policies have to do with carbon markets and renewable energy The authors first examine the effectiveness of the Asian carbon market Because of the consumption of goods beyond provincial borders nationwide carbon markets are rather difficult to operate therefore a desirable initial allocation in the carbon market is proposed in this book As for renewable power its sources have not been fully utilized owing to a regional mismatch of supply and demand so optimal locations of renewable energy are shown The book also contains an analysis of the environmental and economic impacts of changes in resource circulation in East Asia Although motorization is advancing rapidly the vein industry for recycling used cars has not progressed The authors estimate the amount of materials from used cars including new energy vehicles electric and fuel cell vehicles and propose desirable policies for used vehicles East Asia is interdependent with respect to carbon and waste as well as the economy China has regulated the import of waste recently and has started recycling its own wastes putting pressure on neighboring countries to recycle their waste domestically The authors estimate the environmental and economic impacts of such policy changes *The Routledge Handbook of Environmental Economics in Asia* Shunsuke Managi,2015-02-11 Problems of climate change biodiversity and air pollution are clearly growing globally but more particularly in Asia because of its economic importance and richness in nature The increasing interest in environmental and resource economics applied in regions of Asia will make this book an outstanding resource to the existing literature particularly in the fields of environmental and resource economics and the integration of applied content in traditional and agricultural development At present there is no single handbook or text on the state of current knowledge in environmental economics in Asia or one which offers a comprehensive guide to students and academics on the subjects of environmental economics research This book will help to fill the gap in the existing literature Basic Studies in Environmental Knowledge, Technology, Evaluation, and Strategy Takayuki Shimaoka,Takahiro Kuba,Hirofumi Nakayama,Toshiyuki Fujita,Nobuhiro Horii,2016-02-22 This book covers diverse environmental issues such as climate change biodiversity preservation prevention of air water and soil pollution and resource recycling Readers can acquire these four practical interdisciplinary abilities 1 knowledge 2 technology 3 evaluation and 4 strategy in the diverse issues related to the environment These abilities are fundamental to identifying the core essence of economic and ecological interdependence to look at and analyze problems from an overarching perspective and to consider countermeasures to be taken Each chapter of this book corresponds to a lecture in the East Asia Environmental Strategist Training Program at Kyushu University and is excellent reading as a sourcebook Economic History of Energy and Environment S. Sugiyama,2015-05-15 This book is the first volume of a monograph series published by the Socio Economic History Society Japan The purpose of the series is to

make works by Japanese scholars accessible to a wider readership and to increase the knowledge of scholars in this field particularly in relation to Asia This volume includes four chapters on energy and the environment of Japan China and Britain and four short book reviews on recent academic works published in Japanese and English The four chapters cover the following topics the relationship between deforestation and the development of the silk reeling industry in a district of Nagano Prefecture central Japan from the 1870s to the 1900s and the subsequent shift from firewood to coal the importance of timber supplies for the development of industry as illustrated by a case study on the supply of timber for use as rail sleepers in the Japanese national railway network during the prewar period a methodological survey of the history of ecology and the environment in China and an analysis of the British Smoke Nuisance Abatement Act of 1821 as a measure that incorporated the interests of politicians landlords and industrialists

*Theoretical and Empirical Analysis in Environmental Economics* Keiko Nakayama, Yuzuru Miyata, 2019-05-17 This monograph presents potential remedies for some of the current environmental issues in developed countries in a theoretical or empirical manner with the interdisciplinary approaches of economics statistics and engineering The book illustrates effective economic and environmental policies for environmental challenges and factors where corrective policies to date may have failed The importance of this essential book has is related to the transition in the major concerns of the people or governments in developed countries shifting from economic growth to the stability of life and environmental preservation as their economies have matured The environmental issues dealt with here include forest environment tax introduced as part of local taxes air pollution reduction policies for mobile emission sources introduction of renewable energies and power fuel cell technology the mechanism of city agglomeration and dispersion and measurement of environmental sustainability In analytical methods some research employs theoretical approaches such as the mathematical economic model or nonlinear dynamic model Other analyses are implemented with empirical or statistical tools such as the long run general equilibrium model the input output model and the dynamic optimization model among others

Urban and Industrial Management in Developing Countries Wilfrido Cruz, Kazuhiko Takemoto, Jeremy J. Warford, 1998-01-01 This book summarizes the key features of Japan's work to resolve the urban and industrial pollution problems stemming from its rapid post war industrial expansion Drawing upon views expressed by Japanese and participants from other East Asian countries in an international workshop this book identifies the main areas in which developing countries may profit from the Japanese example The report also contains a series of short essays by Japanese experts on Japan's environmental management history recent trends in Japanese environmental indicators and summaries of key themes that emerged during the workshop
