

A 3D finite element model of a pile group in soil. The model shows a central pile group with five vertical piles. The soil is represented by a mesh of elements, colored with a gradient from blue at the top to red at the bottom, indicating stress or strain distribution. The pile group is shown in a cross-section, with the piles extending downwards into the soil. The soil surface is slightly indented around the pile group. The model is set against a white background.
