

There is widespread disagreement on what poverty is, what the best measure is, and what the immense quantity of data we have on poverty means. Poverty in the United States today has many faces and is difficult to define. There's the middle-aged man on a city street holding up a sign begging for his next meal. There's the face of a young child in a school somewhere, whose only real meal today will be a free school lunch. There's the sad face of a single mother who doesn't have enough money to buy clothes for her children. And there's the frustrated face of a man working at a minimum-wage job who can't afford to pay rent.

According to the Census Bureau poverty is defined as a state or condition in which a person or community lacks the financial resources and essentials to enjoy a minimum standard of life and well-being that's considered acceptable in society. There are two common measure of poverty in the United States. One is a poverty threshold based on income levels, set by the Department of Health and Human Services. **Exclusion and Poverty in India and Central Asia** Chittaranjan Senapati,2016-09-09 The early years of 1990s economic reform and change has neglected social sectors both in India and Central Asia As a result poverty has also increased in India and Central Asian countries The economic political and social situation has worsened in all Central Asian states due to transition from command economy to market economy The early 1990s political decision has been dominated by a narrowly conceived version of economic policy for both India and Central Asia As a result the quality and the structure of social protection changed in a negative way Indeed in some cases the pursuit of a strict economic orthodoxy has left various sections of the community marginalized and alienated Both the societies confront a number of challenges that is as profound as the economic changes of the past The process of globalization and technical change has influenced economy and society in complex ways including raising expectations of consumption and remuneration for skilled knowledge workers creating greater demand for some information skills and services causing unemployment amongst those with few qualifications and destabilizing some traditional ways of life and increasing social exclusion It detaches groups and individuals from social relations and institutions and prevents them from full participation in the normal activities of the society In India and Central Asia communities face social exclusion on the basis of their identity as ethnic groups socio economic groups religious community and gender Inclusive development therefore is essential and it should be the top priority in development programs of India and Central Asia Research in this area has not been touched upon so far Since Central Asian countries are relatively new and trying to establish their democratic institutions this piece of work will be helpful for their nation building processes So far as the mutual benefit for both the regions is concerned India is an old democracy and its inclusive policy can be lessons for Central Asian countries On the other hand the experience of Central Asias policy implementation can be a lesson for India This piece of work has potential impulses to policy makers academicians and researchers of these five Central Asian countries and India This work

Annamaria Di Fabio, David L. Blustein, 2016-09-21 This Research Topic explores issues that are central to the continued relevance of organizational and vocational psychology and equally central to the well being of individuals and communities The cohering theme of this publication revolves around the question of how people can establish meaningful lives and meaningful work experiences in light of the many challenges that are reducing access to decent work Another essential contextual factor that is explored in this volume is the Decent Work Agenda International Labour Organization 2008 which represents an initiative by the International Labour Organization In this book we hope to enrich the Decent Work Agenda by infusing the knowledge and perspectives of psychology into contemporary discourses about work and well being Another inspiration for this project emerged from the UNESCO Chair in Lifelong guidance and counseling recently established in Poland in 2013 under the leadership of Jean Guichard which has focused on advancing research and policy advocacy about decent work This new era calls for an innovative perspective in constructing decent work and decent lives the passage from the paradigm of motivation to the paradigm of meaning where the sustainability of the decent life project is anchored to a meaningful construction During this period when work is changing so rapidly leaving people yearning for a sense of connection and meaning it's fundamental to create a framework for an explicitly psychological analysis of decent work
