Introduction to Integrated Pest Management M.L. Flint, R. van den Bosch, 2012-12-06 Integrated control of pests was practiced early in this century well before anyone thought to call it integrated control or still later integrated pest management IPM which is the subject of this book by Mary Louise Flint and the late Robert van den Bosch USDA entomologists W D Hunter and B R Coad recommended the same principles in 1923 for example for the control of boll weevil on cotton in the United States In that program selected pest tolerant varieties of cotton and residue destruction were the primary means of control with insecticides considered supplementary and to be used only when a measured incidence of weevil damage occurred Likewise plant pathologists had also developed disease management programs incorporating varietal selection and cultural procedures along with minimal use of the early fungicides such as Bordeaux mixture These and other methods were practiced well before modern chemical control technology had developed Use of chemical pesticides expanded greatly in this century at first slowly and then following the launching of DDT as a broadly successful insecticide with rapidly increasing momentum In 1979 the President's Council on Environmental Quality reported that production of synthetic organic pesticides had increased from less than half a million pounds in 1951 to about 1.4 billion pounds or about 3000 times as much in 1977 *IPM in Practice, 2nd Edition* Mary Louise Flint, 2012 IPM in Practice features IPM strategies for weed insect pathogen nematode and vertebrate pests and provides specific information on how to set up sampling and monitoring programs in the field This manual covers methods applicable to vegetable field and tree crops as well as landscape and urban situations Designed to bring you the most up to date research and expertise this manual draws on the knowledge of dozens of experts within the University of California public agencies and private practice
