

5th grade FCAT 2.0 Science Study Guide

THE NATURE OF SCIENCE!

- 1.) 3 types of scientific investigations: a controlled experiment, repeated observations, or making a model
- 2.) A **control group** is used to compare the test group (the group with "treatment") to a control group with no "treatment" to see if the "treatment" in fact made a change. A control group is very important to the design of an experiment to be sure that what you are testing is actually working as suspected. For example, if you wanted to know which laundry detergent works best. You would have two types of detergent. You would control the type of fabric, the stain, the amount of time the stain sat in, the temperature of the water, the amount of time the stain is scrubbed, etc... You would also have a control group. This group would get NO detergent so you could see if detergent actually worked better than water alone with no detergent.
- 3.) It's very important for scientists to write down **EVERY** step of an investigation so they can repeat it for repeated trials so their results are reliable, **AND** so other scientists can **REPLICATE** their experiment. [Replicate means to repeat an experiment **AND** get similar or the same results.] Scientists repeat and replicate experiments of others to test validity and reliability. The more often an experiment can be replicated, the more accepted the findings.
- 4.) When you gather information about the real world through the use of your senses you are gathering **observations!**

N. Colamery,2000 Literacy is defined as the ability to read and write One would expect that as the world enters the 21st century of the Third Millennium we wouldn't even need to discuss such a topic But alas that is not the case Even in the United States the only so called superpower left standing at the moment the rate of illiteracy is astonishing Some cynics say that there is no cause for alarm since the rich elite class needs millions of workers for low paid jobs and the less educated the better Others say that the lack of literacy is the fault of the schools and that if we double the pay of the teachers they will somehow suddenly be interested in teaching Still others say that with television and VCRs everywhere who needs to read and write anyway In this book we have collected citations sorted and indexed them in a way which we hope will be useful for those seeking further information on this topic At the beginning we offer excerpts from some of the fundamental reports summarising the dismal situation *Books In Print 2004-2005* Ed Bowker Staff,Staff Bowker, Ed,2004 **Subject Guide to Books in Print** ,2001 RES 5th Grade Science STAAR Study Guide Responsive Education Solutions,2016-11-01 Individual 5th Grade Science STAAR Study Guide **Spectrum Florida Test Prep, Grade 5** McGraw-Hill Childrens Publishing,Vincent Douglas,2003-08-29 Test with success using Florida Test Prep This book features essential test practice in reading math and language for students in grade 5 and provides the most comprehensive strategies for effective FCAT test preparation Today more than ever students need to be equipped with the skills required for school achievement and success on proficiency tests The book includes suggestions for parents and teachers answer keys progress charts self assessment exercises and scoring rubrics This 160 page book aligns with state and national standards is perfect
