*Handbook of Qualitative Research Methods in Entrepreneurship* Helle Neergaard, John P. Ulhøi, 2007 the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon Craig S Galbraith Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here The credibility of the theory being spoken of is not the stuff of constructed proofs but alignments of critical insight and utility This is where qualitative work can make a difference to the field and where this book makes its mark Robin Holt International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done are doing and will do in entrepreneurship research Every serious entrepreneurship scholar should read it It points at the future Bjørn Bjerke University of Kalmar Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies For those who try to get away from only quantitative studies in both business practice and academic research this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic discourse and narrative approaches It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions This domain is not physics In bringing together such a variety of experts from so many nationalities in this Handbook our Danish colleagues are making entrepreneurship research a realistic global venture Jan Ulijn Eindhoven University of Technology The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches This book is not simply a handbook of qualitative research methods though it well achieves this aim it is also an important contribution towards the field of entrepreneurship research From the Foreword by Sara Carter This expansive and practical Handbook

introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship. It fills a crucial gap in the literature on entrepreneurship theory and just as importantly illustrates how these principles and techniques can be appropriately and fruitfully employed. The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement. The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies. They achieve this by providing concrete examples of research experiences and tangible how-to advice. By clarifying what these research methods entail, how they are currently being used, and how they can be evaluated, this Handbook constitutes a comprehensive and highly accessible methodological toolbox. Dealing with both well-accepted qualitative approaches and lesser-known, rarer, and more novel approaches to the study of entrepreneurship, this Handbook will be invaluable to those studying, researching, and teaching entrepreneurship.

**Inclusive Theory and Practice in Special Education** van Rensburg, Henriette, O'Neill, Shirley, 2020-01-03. Inclusive education retains significant complexity associated with creating a definition, and there is significant importance within the surrounding narratives reflecting the broader definitions. Due to the flexibility within the definition, investigating current practices across an array of definitions becomes essential to developing best practices in special education. **Inclusive Theory and Practice in Special Education** is an essential research book that examines current shifts in the field within the overarching philosophy of inclusion and inclusive education. It reports recent research that focuses on the experiences of teachers and students in classrooms and ways of enhancing the practices of inservice teachers and early career teachers, as well as the preparation of preservice teachers. Besides presenting research from these perspectives, it also addresses a selection of broader issues that impact on policy and curriculum, thus identifying related concerns including those of the wider community. Highlighting a wide range of topics such as learning disabilities, student mobility, and early childhood education, this publication is ideal for researchers, professionals, administrators, curriculum designers, academicians, policymakers, and students.

**Qualitative Research Design** Joseph Alex Maxwell, 1996-05-21. This innovative approach to qualitative design emphasizes the components of a design and how these interact with each other and the environment in which the study is situated.

**Urban Ecclesiology** Pascal D. Bazzell, 2015-05-21. Pascal D. Bazzell brings the marginal ecclesiology of a Filipino ecclesial community facing homelessness (FECH) into contemporary ecclesiological

conversation in order to deepen the ecumenical understanding of today's ecclesial reality. He contributes relevant data to support a theory of an ecclesial oriented paradigm that fosters ecclesial communities within homeless populations. There is an extensive dialogue occurring between ecclesiologies, church planting theories, or urban missions and the urban poor. Yet the situation with the homeless population is almost entirely overlooked. The majority of urban mission textbooks do not acknowledge an ecclesial oriented state of being and suggest that the street level environment is a place where no discipleship can occur and no church should exist. By presenting the FECH's case study, Bazzell emphasizes that it is possible to live on the streets and to grow in the faith of God as an ecclesial community. To be able to describe the FECH's ecclesial narrative, Bazzell develops a local ecclesiological methodology that aims to bridge the gap between more traditional systematic and theoretical ideal ecclesiology and practical oriented ecclesiology, e.g. congregational studies, in order to hold together theological and social understandings of the church in its local reality. He articulates a theological framework for the FECH to reflect on who they are, the essence of identity studies, who they are in relationship to God, the essence of theological studies, and what that means for believers in that community as they relate to God and to each other in ways that are true to who they are and to who God intends them to be, the essence of ecclesial studies. The research provides a seldom heard empirical tour into the FECH's social world and communal identity. The theological findings from the FECH's hermeneutical work on the Gospel of Mark reveal an understanding of church being developed as gathering around Jesus that creates a space for God's presence to be embodied in their ordinary relationships and activities and to invite others to participate in that gathering. Moreover, it addresses ecclesial issues of the supernatural world, honor/shame values, and further develops the neglected image of the familia Dei in classical ecclesiology that encapsulates well the FECH's nature, mission, and place.

Advances in Mixed-Method Evaluation: The Challenges and Benefits of Integrating Diverse Paradigms Jennifer C. Greene, Valerie J. Caracelli, 1997-06-16 Evaluation theory and practice today are characteristically pluralistic embracing diverse perspectives methods data and values within and across studies that aim to generate more insightful and meaningful evaluative claims This volume of New Directions for Evaluation seeks to strengthen the promise of pluralistic evaluation by advancing an enhanced conceptual framework for planning and implementing mixed method evaluation studies Previous mixed method work has concentrated on the technical level of method focusing on combining qualitative and quantitative methods within one evaluation study The present mixed method volume addresses the philosophical level of paradigm analyzing the challenges of combining in one study different even conflicting assumptions about the nature of social phenomena and our claims to know them The volume argues for a shift in the mixed method conversation The shift would be away from a preoccupation with explicit assumptive differences among paradigms such as objectivity subjectivity and realism relativism and toward other characteristics of social inquiry traditions Such characteristics define these traditions in important ways but are not logically irreconcilable The significant advance here is to redirect the bases for mixing methods away from what may well be incommensurable philosophical assumptions and toward other inquiry characteristics that can more productively share a common analytic space Through analysis of illustrative cases this volume presents an array of conceptual and practical ideas for promising mixed method inquiry directions This is the 74th issue of the quarterly journal New Directions for Evaluation For more information on the series please see the Journals and Periodicals page
