Dual Narrative Dynamics Dan Shen, 2022-12-30 Combining narratological and stylistic methods this book theorizes dual narrative dynamics consisting of plot development and covert progression and demonstrates the consequences for the interpretation of literary works In narratives with such dynamics writers work simultaneously with overt and covert trajectories of signification establishing a range of relationships between them The two parallel narrative movements may complement contradict or even subvert each other and these relationships significantly influence readers' understanding not just of events but also of characters, themes and aesthetic values The book provides a systematic theoretical account of such previously neglected dual narrative dynamics substantiated and enriched by the textual analysis of works by Ambrose Bierce, Kate Chopin, Franz Kafka and Katherine Mansfield The study explores the many ways that these authors have used dual dynamics to increase the power of their narratives In addition the book identifies the challenges such dual dynamics present not only for narratology but also for stylistics and translation studies and it develops sound and provocative proposals for meeting those challenges In taking an interdisciplinary approach this book will appeal to scholars and students in the fields of narrative and literary theory, literary criticism, literary stylistics and translation studies
