Writing the course involved generating many new illustrations in the form of both line drawings and visualization screenshots and wanting to get maximum mileage out of this effort the idea of writing a book to accompany the course came about At the University of Hull our practical visualization teaching is based on IRIS Explorer an application builder type package from NAG Ltd Originally this book was to have been both an introduction to visualization and a handbook for beginners in IRIS Explorer with virtual laboratories running throughout it to illustrate certain points Following comments from reviewers however its emphasis has changed
