

The March 2000 Arizona Democratic Party's presidential preference primary illustrates the promise of accessibility, inclusiveness, and accountability in online elections.

THE CASE FOR INTERNET VOTING

How the Internet might alter U.S. democratic institutions, including how Americans get information about and even vote for their public officials in general elections, has been the subject of much debate in recent months. Online voting is one of the more controversial aspects of this debate—a subject that began to claim international attention in March 2000 when the Arizona Democratic Party allowed for the first time remote Internet voting in its presidential preference primary.

The prospect of being able to vote “in your pajamas,” as it’s been described, captured the imagination of political leaders, technology innovators, and voters around the world. Proponents heralded Internet-based elections as a way to boost voter participation by updating aging voting techniques and accommodating the changing needs of the citizenry. Opponents questioned the assumption that online elections would increase turnout, as well as the dependability of the related security, privacy, and equality of access.

Here, we explore the Arizona presidential preference primary as a case study, addressing the main public concerns about online voting, sharing the lessons we learned from our experience, and suggesting improvements for future online elections.

First Legally Binding Political Election

The primary last March 7–11 was the first time voters anywhere in the world were able to cast their ballots from the location of their choice, whether home, work, a public library, or a traditional polling

place. Although this first legally binding political election using remote Internet voting took place in the U.S., it clearly promised global effects. Political leaders and policymakers worldwide have since been investigating the viability of using the Internet for public elections in their own countries, looking to Arizona for insight into managing the process.

As the company selected by the Arizona Democratic Party to actually conduct its primary, *election.com*, Inc., experienced firsthand the pros and cons of Internet voting. As a result, we now feel that Internet voting—implemented responsibly and judiciously—can dramatically increase voter access and reinvigorate voter participation in the political process around the world. We also recognize that the prospect of widespread Internet voting raises serious questions among election officials and voting-rights advocates alike.

As opponents of Internet voting point out, state and federal laws governing elections today are not geared toward overseeing Internet voting and the vendors that run them per se. Lacking clear and explicit guidelines, we therefore went to great lengths in Arizona to implement rigorous procedures and protocols to ensure ballot sanctity and universal accessibility. However, the Arizona primary did not obviate the need for universal guidelines governing best political election practices, third-party risk analysis, intrusion-detection software standards, code migration, or other critical factors.

Increasing Access and Participation

Our first challenge was ensuring that Internet voting would ameliorate, rather than aggravate, disparities

Responsible Partisanship? John Clifford Green,Paul S. Herrnson,2002 More than fifty years have passed since the American Political Science Association published *Toward a More Responsible Two Party System* a controversial report that addressed the lack of national cohesion within the major parties Although parties have changed a great deal since then they remain a critical component of American democracy While the possibilities and limits of responsible party government have been central topics in the literature since 1950 this book is the first to reassess all aspects of the APSA report Here a

distinguished group of scholars among them Charles O Jones Barbara Sinclair Frank J Sorauf John Bibby and Gerald Pomper examine the effectiveness accountability and relevance of parties to the democratic process These articles cover all major relevant topics focusing on recent changes in laws that govern parties innovations in party organization party finance and the relationships among political consultants and parties They examine the place of the party in government including chapters on the changing role of parties in Congress and in the presidency and also consider the roles of parties among the electorate examining trends in voting behavior party identification and ideology A capstone essay by Leon Epstein the dean of American party scholars reviews the ongoing quest for responsible partisanship over the past half century These contributors offer a mixed assessment of the two party system showing that parties are in many respects stronger at the national level than they were in 1950 but not necessarily more responsible The most comprehensive description and analysis of American parties now available **Responsible Partisanship** should become required reading for all students and citizens concerned with making parties more accountable instruments of government
