DECISION TREES AND RULES

LEARNING OF DECISION TREES: ID3

- ID3 (Iterative Dichotomiser, Quinlan, 1980)
- Based on GLS (classifications)
 - only binary attributes
 - heuristic to decide what attribute to choose in each node of the tree
- Set of techniques with commercial success
- Generate decision trees from training examples
- Idea: find the simplest tree that best separates the examples
- Use a heuristic based on entropy to choose the attributes

DECISION TREE EXAMPLE

STRATEGY OF ID3

ALGORITHM

1. Select an attribute A_i that maximizes the information gain $G(A_i)$
2. Create a node for such attribute with as many successors as different values the attribute has
3. Distribute the training examples in the successors, using the value for attribute A_i
4. For each successor: if there's only examples of one class C_k , then label the node with C_k ; otherwise, call ID3 with a table made up of the examples of the node, erasing the column of attribute A_i

Microsoft Azure AI Fundamentals (AI-900) Certification Guide: Master AI, Machine Learning, and Azure Cloud Intelligence to Earn Your Microsoft Azure AI-900 Certification Higor Luis, 2026-02-07 Empower your AI Cloud Career with Microsoft Azure AI 900 Certification KEY FEATURES Complete coverage of Azure AI AI 900 objectives with real world Azure examples Hands on learning using Azure AI Services Azure Cognitive ML and Responsible AI tools Practical exam strategies practice tests and expert driven insights DESCRIPTION The Microsoft Azure AI Fundamentals AI 900 certification is one of

the most in demand credentials and your gateway to understanding AI and how it drives innovation in the cloud The Microsoft Azure AI Fundamentals AI 900 Certification Guide takes you on a step by step journey from foundational AI principles to hands on implementation using Microsoft Azure You will start by exploring the building blocks of AI understanding workloads data science fundamentals and the difference between AI ML and deep learning From there the book dives into Azure Cognitive Services guiding you through Vision Language Speech and Decision making capabilities with practical examples and use cases You will also learn how to build intelligent applications that see hear and understand the world around them As your knowledge deepens you can work with Azure Machine Learning to train evaluate and deploy predictive models explore Generative AI with Azure OpenAI Service and implement responsible AI principles to ensure that your solutions are fair transparent and ethical Each chapter is structured to reinforce understanding through real world scenarios guided exercises and exam focused insights that prepare you for success

WHAT WILL YOU LEARN

Understand core AI workloads and essential features of intelligent systems Explore Azure Cognitive Services for vision language and speech capabilities Build train and deploy machine learning models using Azure Machine Learning Apply Responsible AI principles to design safe fair and ethical solutions Prepare effectively for the AI 900 exam with practical real world examples Learn how AI solutions connect and integrate across Azure cloud services

WHO IS THIS BOOK FOR

This book is ideal for professionals preparing for the Microsoft Azure AI 900 certification including Cloud Engineers AI Developers Data Analysts Solution Architects and Business Analysts who want to understand and apply the core AI concepts using Azure It is also suitable for students and IT practitioners seeking a hands on introduction to AI Machine Learning ML and Responsible AI on the Azure platform No prior AI or data science experience is required

DESCRIPTION Amazon Web Services is the world's most comprehensive and broadly adopted cloud computing platform providing on demand access to IT resources such as computing power database storage and other essential services over the internet with pay as you go pricing With its

vast array of services and tools AWS provides a scalable and flexible environment for developing deploying and managing ML models The purpose of the book is to empower individuals with basic AWS Cloud knowledge to leverage this advanced technology and obtain the coveted AWS Certified Machine Learning Specialty certification By mastering the intricacies of AWS ML services readers can unlock new career opportunities and contribute to the ever evolving field of ML It guides the readers through the domains of data engineering exploratory data analysis modeling and ML implementation and operations Covering key concepts and practices this guide equips individuals with fundamental AWS Cloud knowledge By the end of this book readers will learn to create efficient data repositories perform data transformation sanitize and prepare data engineer features select and train ML models optimize performance build scalable solutions leverage AWS ML services apply security practices and deploy operational ML solutions

WHAT YOU WILL LEARN Understanding AWS ML services including SageMaker Lambda Glue and other ML tools Design secure S3 EFS and EBS repositories implement data ingestion solutions and perform data transformation Frame business problems select supervised unsupervised or ensemble models Sanitize and prepare data for modeling perform feature engineering and analyze data for ML Solving ML problems by selecting and training appropriate ML models Perform hyperparameter optimization evaluate ML models and build performant ML solutions Deploy models set A B testing IAM security and auto scaling pipelines Apply AWS security practices to ML solutions and deploy operational ML systems

WHO THIS BOOK IS FOR This book is designed for aspiring ML specialists data scientists data engineers cloud architects and any professionals seeking to enhance their skills and knowledge in AWS ML services Readers should possess a basic understanding of ML concepts experience with a programming language like Python and foundational familiarity with core AWS services

vector learning multiple models for classification inductive logic programming relational learning instance based learning clustering genetic algorithms reinforcement learning and neural networks

Databricks Certified Machine Learning Associate Certification Practice 300 Questions & Answer Rashmi Shah, This book serves as a comprehensive guide for individuals preparing for the Databricks Certified Machine Learning Associate certification exam It is meticulously designed to cover the entire scope of the examination which assesses an individual's proficiency in leveraging Databricks for fundamental machine learning tasks The certification validates the ability to understand and effectively utilize Databricks machine learning capabilities including advanced features like AutoML Unity Catalog and select functionalities of MLflow Furthermore it evaluates skills in data exploration feature engineering model building encompassing training tuning and evaluation model selection and the crucial aspect of deploying machine learning models Passing this certification signifies an individual's capability to execute basic machine learning tasks proficiently using Databricks and its integrated toolset The examination's content is structured across key domains with specific weightages Databricks Machine Learning 38% ML Workflows 19% Model Development 31% Model Deployment 12% A detailed breakdown of the exam outline which this book thoroughly addresses includes

Section 1 Databricks Machine Learning This section delves into the core aspects of MLOps strategies emphasizing best practices and the advantages of using ML runtimes It covers how AutoML facilitates model and feature selection highlighting its benefits in the model development process A significant focus is placed on Unity Catalog including the advantages of creating account level feature store tables versus workspace level the practical steps to create and write data to a feature store table and how to train and score models using features from these tables The differences between online and offline feature tables are also explored MLflow's role is extensively covered from identifying the best run using the MLflow Client API and manually logging metrics artifacts and models to understanding the MLflow UI The book details model registration in the Unity Catalog registry via the MLflow Client API contrasting its benefits with the workspace registry It also addresses scenarios for promoting code versus models and managing model versions through tags and aliases e.g promoting a challenger to a champion model

Section 2 Data Processing This part of the book focuses on essential data manipulation and preparation techniques within a Spark environment It covers computing summary statistics on a Spark DataFrame using summary or dbutils data summaries and methods for outlier removal based on standard deviation or IQR Emphasis is placed on creating visualizations for both categorical and continuous features and comparing feature types using appropriate methods The book provides a comprehensive understanding of imputing missing values with mode mean or median and the practical application of one hot encoding for categorical features including identifying appropriate scenarios for its use It also discusses the relevance and application of log scale transformation

Section 3 Model Development This section guides the reader through the intricacies of model building It covers selecting appropriate algorithms based on ML foundations for given scenarios and methods to mitigate data imbalance in training data The book differentiates between

estimators and transformers and provides guidance on developing robust training pipelines Hyperparameter tuning is a key focus detailing the use of Hyperopt's fmin operation and exploring random grid or Bayesian search methods It also addresses parallelizing single node models for hyperparameter tuning The benefits and downsides of cross validation versus train validation splits are discussed along with practical application of cross validation in model fitting and understanding the number of models trained during grid search and cross validation The book extensively covers common classification metrics F1 Log Loss ROC AUC and regression metrics RMSE MAE R squared guiding the reader in choosing the most appropriate metric for specific objectives Finally it addresses the need to exponentiate log transformed variables before evaluation and interpreting predictions and assessing the impact of model complexity and the bias variance tradeoff on model performance

Section 4 Model Deployment The final section of the book is dedicated to deploying machine learning models It differentiates between and highlights the advantages of various model serving approaches batch real time and streaming Practical steps for deploying a custom model to a model endpoint are provided The book covers using pandas for performing batch inference and explains how streaming inference is achieved with Delta Live Tables It also details deploying and querying a model for real time inference and splitting data between endpoints for real time interference

Assessment Details The Databricks Certified Machine Learning Associate exam is a proctored certification consisting of 48 multiple choice questions Candidates are allotted 90 minutes to complete the exam The registration fee is 200 No test aids are permitted during the examination The exam is available in English Japanese Brazilian Portuguese and Korean and is delivered via online proctoring

Prerequisites and Recommendations While there are no formal prerequisites for taking the exam related training is highly recommended QuickTechie.com offers valuable resources and insights that can aid in preparing for this certification ensuring a solid understanding of the concepts A recommended experience level of 6 months of hands on experience performing the machine learning tasks outlined in the exam guide is suggested for optimal preparation

Validity and Recertification The certification has a validity period of two years To maintain certified status recertification is required every two years by taking the current version of the exam QuickTechie.com can be a useful reference for staying updated on the latest exam versions and preparation strategies for recertification

Unscored Content It is important to note that the exam may include unscored items These items are included to gather statistical information for future use and are not identified during the exam They do not impact the candidate's score and additional time is factored into the exam duration to account for their presence

Machine Learning Ivan Bratko, Sašo Ožeroski, 1999 The Sixteenth International Conference on Machine Learning ICML 99 was held June 27-30 1999 in Bled Slovenia It was co-located with the Ninth International Workshop on Inductive Logic Programming ILP 99 These are the papers from this conference covering topics on empirical theoretical and cognitive modelling research in all areas of machine learning
