Estimation of Panel Vector Autoregression in Stata, 2016 Macroeconomic Policy Framework for Africa's Structural Transformation Carlos Lopes, Abdalla Hamdok, Adam Elhiraika, 2017-08-11 The main objective of this book is to identify the key sources of growth which have played a significant role in Africa's recent robust growth as well as its efforts towards economic transformation. The book assesses to what extent the existing macroeconomic frameworks among African countries have been streamlined to the countries' development priorities in order to achieve long-term growth and economic transformation. Taking into account the diversity of African countries, the authors establish the economic linkages between relevant macroeconomic policy variables and the key sources of growth and development among the selected African economies based on both theoretical and empirical underpinnings. Following this, an outline of a macroeconomic framework for Africa's long-term growth and economic transformation is suggested.

Time Series Econometrics John D. Levendis, 2023-12-23 Revised and updated for the second edition, this textbook allows students to work through classic texts in economics and finance using the original data and replicating their results. In this book, the author rejects the theorem-proof approach as much as possible and emphasizes the practical application of econometrics. They show with examples how to calculate and interpret the numerical results. This book begins with students estimating simple univariate models in a step-by-step fashion using the popular Stata software system. Students then test for stationarity while replicating the actual results from hugely influential papers such as those by Granger, Newbold, and Nelson-Plosser. Readers will learn about structural breaks by replicating papers by Perron and Zivot-Andrews. They then turn to models of conditional volatility replicating papers by Bollerslev. Students estimate multi-equation models such as vector autoregressions and vector error correction mechanisms replicating the results in influential papers by Sims and Granger. Finally, students estimate static and dynamic panel data models replicating papers by Thompson and Arellano-Bond. The book contains many worked-out examples and many data-driven exercises. While intended primarily for graduate students and advanced undergraduates, practitioners will also find the book useful. How to best start learning time series econometrics: Learning by doing. This is the ethos of this book. What makes this book useful is that it provides numerous worked-out examples along with basic concepts. It is a fresh, no-nonsense practical approach that students will love when they start learning time series econometrics. I recommend this book strongly as a study guide for students who look for hands-on learning experience.

Professor Sokbae Simon Lee, Columbia University, Co-Editor of *Econometric Theory* and Associate Editor of *Econometrics Journal*. Physical Capital Development and Energy Transition in Latin America and the Caribbean Jose Alberto Fuinhas, Matheus Koengkan, Renato Santiago, 2021-07-10 *Physical Capital Development and Energy Transition in Latin America and the Caribbean* introduces the reader to applied theory and potential solutions to manage the transition from fossil energies to renewables given the resource wealth and infrastructural limitations of Latin American and Caribbean LAC countries. The work presents consistent

empirical approaches and relevant econometric approaches grounded in case studies that offer realistic portrayals of complex multidisciplinary phenomena It provides policymakers with the knowledge needed for economic decision making especially regarding the energy transition and the physical capital development in the LAC and similar developing regions The work concludes by road mapping future LAC physical capital investment options to promote 21st century sustainable energy development Analyses the macroeconomics of physical capital and energy transition in LAC countries Uses case studies to draw pragmatic comparative energy policy implications Deploys econometric techniques to address empirical approaches on energy and development economics Discusses the effects of the energy transition on environmental degradation Links energy economics and public investment management

Global Business Strategies in Crisis Ümit Hacıoğlu, Hasan Dinçer, Nihat Alayoğlu, 2016-12-07 As the world is currently in the midst of financial and economic crises this collection of expert contributions focuses on strategy formation and implementation at various organizational levels to address the challenges ahead The latest economic turmoil and its ongoing impact on business performance are compelling top managers to develop effective business strategies and redefine the boundaries of their operational and strategic activities On one hand tremendous challenges in the competitive business environment have become a source of global threats for many small entrepreneurs On the other investors faced with today's volatile economic conditions demand more gains on their capital investments to counter balance the growing risk of global threats This book explores the question as to whether it is possible to efficiently and effectively address these threats and obstacles Are managers capable of planning and implementing strategic actions What should the major managerial strategy be in order to overcome fluctuations in a market oriented society The strategies and practices recommended here are aimed to design continuous development competencies and contribute to the stability recovery and sustainability of global business operations under volatile economic conditions This refreshingly novel book seeks to establish managerial strategies and practices for effectively responding to challenges in the competitive business environment as global volatility and fluctuations continue to worsen
