**From Corpus to Classroom**

Anne O'Keeffe, Michael McCarthy, Ronald Carter, 2007-05-03 *From Corpus to Classroom* summarises and makes accessible recent work in corpus research focusing particularly on spoken data. It is based on analysis of corpora such as CANCODE and Cambridge International Corpus and written with particular reference to the development of corpus informed pedagogy. The book explains how corpora can be designed and used and focuses on what they tell us about language teaching. It examines the relevance of corpora to materials writers, course designers and language teachers and considers the needs of the learner in relation to authentic data. It shows how the answers to key questions such as 'Is there a basic everyday vocabulary for English?' 'How should idioms be taught?' and 'What are the most common spoken language chunks?' are best explored by means of a clearer understanding of the workings of language in context. [Handbook of Research in Second Language Teaching and Learning](#) Eli Hinkel, 2016-11-18 Volume III of the *Handbook of Research in Second Language Teaching and Learning* like Volumes I and II is a comprehensive state of the art overview of current research into social contexts of second language L2 foreign language FL teaching and learning, language policy, curriculum types of instruction, incremental language skills such as listening, speaking, reading, writing, vocabulary and grammar, international communication, pragmatics, assessment and testing. It differs from earlier volumes in its main purpose to provide a more in depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2 FL teaching and learning and applied linguistics but rather than offering a historical review of disciplinary traditions it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III: Updates the prominent areas of research including the sub disciplines addressed in Volumes I and II and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how and the why of teaching foundational language skills including theories, pedagogical principles and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2 FL teaching and learning and innovative research topics that have gained substantial recognition in current publications including the role of corpora, technology and digital literacy in L2 FL teaching and learning. Examines new trends in language pedagogy and research such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy and the growing needs for instruction in intercultural communication.
