### Abstract

This study investigates hotel maintenance management practices and the barriers in implementing these practices from maintenance managers' viewpoint in the Egyptian 5-star hotels. The study used the comprehensive sample. A total of 160 questionnaires were distributed to the maintenance managers in the Egyptian 5-star hotels. The results indicated that the practices of 'maintenance management plan' and 'maintenance management team' play the most significant role in influencing their maintenance efficiency. The results also indicate that 'insufficient fund for maintenance job' and 'Lack of skilled personnel in maintenance departments' are the major barriers responsible for the poor implementation of maintenance management. This study provides guidance and references for better building maintenance management system for Egyptian hotels. It would enable the hotel operators to achieve better maintenance efficiency through various strategies and practices.

Insufficient proactive maintenance strategies and as a result much of the manpower is wasted in performing the corrective maintenance.

- Maintenance personnel are too focused on technical responsibilities than managerial, social, legal, financial, and inter-departmental communication issues.
- Maintenance performance is generally hard to measure, as it should not only consider quantifiable parameters but also the quality of the performed maintenance and its organization.
- The lack of building maintenance objectives, which are not properly coordinated and not matching with organizational directions. Operators need to maintain brand image which may clash with owners' revenue targets.
- Hospitality facilities requires higher maintenance and renovation cost than residential and industrial buildings, as they are more dynamic, complex, in construction and installation.
- Lack of complete recordkeeping of hotels maintenance activities.
- Rare research on maintenance for hotel facilities.
- There is no unique maintenance strategy suitable for all types of buildings due to different characteristics, such as design, purposes, construction forms, uses, building services ... etc.
