This unique and interdisciplinary workforce is part of the healthcare team and serves as the intersection between engineering and medicine. This book is aimed at practitioners, managers, students, and educators to serve as a resource that offers a broad perspective of the applications of engineering principles, regulatory compliance, lifecycle planning, systems thinking, risk analysis, and resource management in healthcare. This book is an invaluable tool for healthcare technology management (HTM) professionals and can serve as a guide for students to explore the profession in depth. Offers readers an in-depth look into the support and implementation of existing medical technology used for patient care in a clinical setting. Provides insights into the clinical engineering profession focusing on engineering principles as applied to the US healthcare system. Explores healthcare technology, hospital and systems safety, information technology, and interoperability with medical devices, clinical facilities management, as well as human resource management.

ITIL lifecycle suite, 2011 The ITIL 2011 Editions have been updated for clarity, consistency, correctness, and completeness. ITIL is based upon a lifecycle approach, and the core guidance consists of five publications: ITIL Service Strategy, ITIL Service Design, ITIL Service Transition, ITIL Service Operation, and ITIL Continual Service Improvement. Each of the five publications represents a stage in the ITIL service lifecycle. With each stage influencing and relying upon the others, the lifecycle moves cyclically from service strategy, where the business requirements are set, to the design, transition, operation, and continual improvement of IT services. The lifecycle is driven by business needs and requirements and has a continual feedback system built into every stage to ensure that an organization's service management offering continues to provide measurable value to the business. The process-based framework of the service lifecycle can be adopted and adapted by organizations of all types and sizes.
