Quality Assurance in Analytical Chemistry Bernd W. Wenclawiak, Michael Koch, Evsevios Hadjicostas, 2010-08-05 knowledge This material provided has been collected from different sources One important source is the material available from EURACHEM Eurachem is a network of organisations in Europe having the objective of establishing a system for the international tra ability of chemical measurements and the promotion of good quality practices It provides a forum for the discussion of common problems and for developing an informed and considered approach to both technical and policy issues It provides a focus for analytical chemistry and quality related issues in Europe You can find more information about EURACHEM on the internet via Eurachem A Focus for Analytical Chemistry in Europe <http://www.eurachem.org> In particular the site Guides and Documents contains a number of different guides which might help you to set up a quality system in your laboratory The importance of quality assurance in analytical chemistry can best be described by the triangles depicted in Figs 1 and 2 Quality is checked by testing and testing

guaranties good quality Both contribute to progress in QA product control and quality and thus to establishing a market share Market success depends on quality price and flexibility All three of them are interconnected Before you can analyse anything the sample must be taken by someone This must be of major concern to any analytical chemist There is no accurate analysis without proper sampling For correct sampling you need a clear problem definition There is no correct sampling without a clear problem definition
