N Widths In Approximation Theory:

n-Widths in Approximation Theory A. Pinkus, 2012-12-06 My original introduction to this subject was through conversations and ultimately joint work with C. A. Micchelli. I am grateful to him and to Profs. C. de Boor, E. W. Cheney, S. D. Fisher, and A. A. Melkman who read various portions of the manuscript and whose suggestions were most helpful. Errors in accuracy and omissions are totally my responsibility. I would like to express my appreciation to the SERC of Great Britain and to the Department of Mathematics of the University of Lancaster for the year spent there during which large portions of the manuscript were written and also to the European Research Office of the U.S. Army for its financial support of my research endeavors. Thanks are also due to Marion Marks who typed portions of the manuscript.

N-Widths in Approximation Theory A. Pinkus, 1984-12-01

Methods of Approximation Theory in Complex Analysis and Mathematical Physics Andrei A. Gonchar, Edward B. Saff, 2008-01-03 The book incorporates research papers and surveys written by participants of an International Scientific Programme on Approximation Theory jointly supervised by Institute for Constructive Mathematics of University of South Florida at Tampa, USA and the Euler International Mathematical Institute at St. Petersburg, Russia. The aim of the Programme was to present new developments in Constructive Approximation Theory. The topics of the papers are asymptotic behaviour of orthogonal polynomials, rational approximation of classical functions, quadrature formulas, theory of n widths, nonlinear approximation in Hardy algebras, numerical results on best polynomial approximations, wavelet analysis.
