European Building Construction Illustrated Francis D. K. Ching,Mark Mulville,2014-02-10 The first European edition of Francis DK Ching s classic visual guide to the basics of building construction For nearly four decades the US publication *Building Construction Illustrated* has offered an outstanding introduction to the principles of building construction This new European edition focuses on the construction methods most commonly used in Europe referring largely to UK Building Regulations overlaid with British and European while applying Francis DK Ching s clear graphic signature style It provides a coherent and essential primer presenting all of the basic concepts underlying building construction and equipping readers with useful guidelines for approaching any new materials or techniques they may encounter *European Building Construction Illustrated* provides a comprehensive and lucid presentation of everything from foundations and floor systems to finish work Laying out the material and structural choices available it provides a full understanding of how these choices affect a building s form and dimensions Complete with more than 1000 illustrations the book moves through each of the key stages of the design process from site selection to building components mechanical systems and finishes *Illustrated* throughout with clear and accurate drawings that effectively communicate construction processes and materials Provides an overview of the mainstream construction methods used in Europe Based around the UK regulatory framework the book refers to European level regulations where appropriate References leading environmental assessment methods of BREEAM and LEED while outlining the Passive House Standard Includes emerging construction methods driven by the sustainability agenda such as structural insulated panels and insulating concrete formwork Features a chapter dedicated to construction in the Middle East focusing on the Gulf States

Building Services Engineering David V. Chadderton,2013-01-25 Engineering services within buildings account for ongoing energy use greenhouse gas contribution and life safety provisions This fully updated sixth edition of David Chadderton s leading textbook is the perfect preparation for those intending to enter this increasingly important field Chapters addressing heating climate change air conditioning transportation systems water gas electricity drainage and room acoustics cover all the key responsibilities of the building services engineer As well as introductory material and the underpinning theory practical guidance is provided in the form of sample calculations and spreadsheets New material includes trends and recent applications in lowering the energy use by mechanical and electrical services systems heating cooling and lighting of buildings case studies modelled from post

occupancy reports to provide realistic discussion topics examples of the use of photovoltaic solar panels chilled beams under floor air distribution labyrinths ground sourced heat pumps district heating and cooling energy performance certificates energy auditing and wind turbines outlines of the concepts of global warming carbon trading and zero carbon buildings exercises in each chapter and online self study questions A significantly expanded companion site offers over 1 000 self test questions powerpoint slides for lecturers and an instructors manual enabling the rapid generation of lectures assignments and tests This is the ideal textbook for students of building services engineering as well as a comprehensive guide for those about to start work

Heating Services in Buildings David E. Watkins,2011-09-26 Water based heating systems are efficient flexible versatile and offer many advantages over other heating systems These advantages fast response good controllability efficient zonal heating and largely silent operation all require that initial design installation commissioning and maintenance be carried out to a high standard by competent engineers Heating Services in Buildings provides the reader with a detailed and thorough understanding of the principles and elements of heating buildings using modern water based heating systems A key theme of the book is that there is little difference in the approach to the design and engineering between domestic and commercial installations The author s detailed but highly practical approach to the subject ensures there is sufficient information for students from both a craft background and those with more academic backgrounds to understand the material This approach is complemented by straightforward easy to use diagrams Heating Services in Buildings supports a range of educational courses including degree level building services engineering NVQ Level 4 Higher Professional Diploma in Building Services Engineering City Guilds supplementary heating course and the Heating Design and Installation Course accredited by the European Registration Scheme ERS

Heating and Water Services Design in Buildings Keith J. Moss,1996 Avoiding the need for a detailed knowledge of mathematical theory this book involves the reader in working through examples and case studies to come to a thorough understanding of the design of heating and water services in buildings
