Behind the Swap Andrew DeJoy,2022-05-10 Andrew DeJoy s Behind the Swap examines the risks involved in post trade processing in swaps and derivative markets and provides solutions to better control those risks While Andrew doesn t claim to have all the answers he does believe there is a way to create a safer stronger and better financial system for all stakeholders In August of 2020 Citibank made one of the worst mistakes in banking history it accidentally sent out almost 900 million of its own funds Many of the recipients didn t give back the money Citibank sued And a federal court ruled that the recipients could keep the funds Citibank s error is not surprising The underlying contributors that led to the mistaken payment permeate the global financial services industry Manual data entry decades old technological infrastructure inadequate training and systems that can t interact with one another are just a few of the problems that face post trade processing the machinery behind financial markets Unfortunately years of neglect by regulators and financial institutions themselves has left this infrastructure needlessly complex astoundingly inefficient frequently inaccurate and woefully inadequate for modern financial markets Behind the Swap helps explain what s driving the recent series of banking blunders like Barclay s 678 million clerical error and Citibank s fat finger Flash Crash that caused an 8% decline in the Swedish stock market The book also touches on concepts that readily connect to Credit Suisse s 5.5 billion loss on its trades with Archegos The problems are easy to see but difficult to admit For financial institutions the current system costs billions of dollars each year in labor systems maintenance and lost funds For regulators the current system precludes the ability to track systemic risk It also artificially inflates the stability of the global financial system For lawyers and prosecutors the current system allows ample opportunity for unlawful misconduct such as rogue trading and fraud

practice based research on working with communities and making sensor toolkits to detect pollution while examining the political subjects relations and worlds these technologies generate Drawing on data from the Citizen Sense research group which worked with communities in the United States and the United Kingdom to develop digital sensor toolkits Jennifer Gabrys argues that citizen oriented technologies promise positive change but then collide with entrenched and inequitable power structures She asks Who or what constitutes a citizen in citizen sensing How do digital sensing technologies enable or constrain environmental citizenship Spanning three project areas this study describes collaborations to monitor air pollution from fracking infrastructure to document emissions in urban environments and to create air quality gardens As these projects show how people respond to care for and struggle to transform environmental conditions informs the political subjects and collectives they become as they strive for more breathable worlds
