New Approaches in Intelligent Control Kazumi Nakamatsu, Roumen Kountchev, 2016-06-02 This volume introduces new approaches in intelligent control area from both the viewpoints of theory and application It consists of eleven contributions by prominent authors from all over the world and an introductory chapter This volume is strongly connected to another volume entitled *New Approaches in Intelligent Image Analysis* Eds Roumen Kountchev and Kazumi Nakamatsu The chapters of this volume are self contained and include summary conclusion and future works Some of the chapters introduce specific case studies of various intelligent control systems and others focus on intelligent theory based control techniques with applications A remarkable specificity of this volume is that three chapters are dealing with intelligent control based on paraconsistent logics

Renewable Energy Thomas Hammons, 2009-12-01 Renewable Energy is energy generated from natural resources such as sunlight wind rain tides and geothermal heat which are naturally replenished In 2008 about 18% of global final energy consumption came from renewables with 13% coming from traditional biomass such as wood burning Hydroelectricity was the next largest renewable source providing 3% 15% of global electricity generation followed by solar hot water heating which contributed with 1 3% Modern technologies such as geothermal energy wind power solar power and ocean energy together provided some 0 8% of final energy consumption The book provides a forum for dissemination and exchange of up to date scientific information on theoretical generic and applied areas of knowledge The topics deal with new devices and circuits for energy systems photovoltaic and solar thermal wind energy systems tidal and wave energy fuel cell systems bio energy and geo energy sustainable energy resources and systems energy storage systems energy market management and economics off grid isolated energy systems energy in transportation systems energy resources for portable electronics intelligent energy power transmission distribution and inter connectors energy efficient utilization environmental issues energy harvesting nanotechnology in energy policy issues on renewable energy building design power electronics in energy conversion new materials for energy resources and RF and magnetic field energy devices

Proceedings of International Conference on Communication and Computational Technologies Sandeep Kumar, Saroj Hiranwal, Ritu Garg, S.D. Purohit, 2025-01-18 This book gathers selected papers presented at 6th International Conference on Communication and Computational Technologies ICCCT 2024 jointly organized by Soft Computing Research Society SCRS and Rajasthan Institute of Engineering Technology RIET Jaipur during January 8 9 2024 The book is a collection of state of the art research work in the cutting edge technologies related to the communication and intelligent systems The topics covered are algorithms and applications of intelligent systems informatics and applications and communication and control systems

Cybernetics Perspectives in Systems Radek Silhavy, 2022-07-04 This book contains the refereed proceedings of the Cybernetics Perspectives in Systems session of the 11th Computer Science On line Conference 2022 CSOC 2022 which was held in April 2022 online Papers on modern cybernetics and informatics in the context of networks and systems are an

important component of current research issues This volume contains an overview of recent method algorithms and designs

Control and Information Sciences V. I. George, K. V. Santhosh, Samavedham Lakshminarayanan, 2024-05-16 This book presents the select peer reviewed proceedings of the Control Instrumentation and System Conference CISCON 2022 held at Manipal Institute of Technology MAHE Manipal It examines a wide spectrum covering the latest trends in the fields of instrumentation sensors and systems and industrial automation and control The topics covered include image and signal processing robotics renewable energy power systems and power drives performance attributes of MEMS multi sensor data fusion machine learning optimization techniques process control safety monitoring safety critical control supervisory control system modeling and virtual instrumentation The book is a valuable reference for researchers and professionals interested in sensors adaptive control automation and control and allied fields

Computational and Ambient Intelligence Francisco Sandoval, Alberto Prieto, Joan Cabestany, Manuel Graña, 2007-09-21 This book constitutes the refereed proceedings of the 9th International Work Conference on Artificial Neural Networks IWANN 2007 held in San Sebastian Spain in June 2007 Coverage includes theoretical concepts and neurocomputational formulations evolutionary and genetic algorithms data analysis signal processing robotics and planning motor control as well as neural networks and other machine learning methods in cancer research

Controlling with SIMATIC Jürgen Müller, 2005 This book discusses the practical aspects of control engineering as a sub domain of automation and control using as example the SIMATIC S7 control system It is directed at people responsible for planning and configuration working in marketing and sales and at those involved in the implementation or commissioning of control systems in production engineering and industrial plant construction It is equally suitable for engineers configuring engineers and process engineers
