Norms in the English Language Miriam A. Locher, Jürg Strässler, 2008-08-27 The theme of this collection is a discussion of the notions of norms and standards which are studied from various different angles but always in relation to the English language. These terms are to be understood in a very wide sense allowing discussions of topics such as the norms we orient to in social interaction, the benchmark employed in teaching or the development of English dialects and varieties over time and space and their relation to the standard language. The collection is organized into three parts each of which covers an important research field for the study of norms and standards. Part 1 is entitled English over time and space and is further divided into three thematic subgroups: standard and non-standard features in English varieties and dialects; research on English standardization processes and issues of standards and norms in oral production. Part 2 deals with English usage in non-native contexts and Part 3 is dedicated to Issues on politeness and impoliteness. The notions of standards and norms are equally important concepts for historical linguists, sociolinguists with a variationist background, applied linguists, pragmaticians and discourse analysts. *Advanced Grammar in Use Book with Answers and CD-ROM* Martin Hewings, 2013-03-07 CD-ROM provides over 200 extra exercises to help you practice the grammar presented P 3 of cover.

Cognitive Approaches to English Mario Brdar, Marija Omazić, Višnja Pavičić Takač, 2009 The present volume contains a selection of papers presented at the conference Cognitive Approaches to English, an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy Josip Juraj Strossmayer University Osijek which was held in Osijek on October 18-19, 2007. The participants were invited to discuss issues in cognitive accounts of English ranging from fundamental to methodological to interdisciplinary and applied. The volume is accordingly divided into four parts. Part I Motivation in grammar deals with various phenomena in the grammar of English in the broadest sense of the term, all of which are shown to be motivated by metaphorical and/or metonymic operations. Part II Constructing meaning between grammar and lexicon contains five chapters dealing with phenomena ranging from various peculiarities of form-meaning pairings such as synonymy, polysemy and figurative meanings to concept formation. The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural variation in the use of metaphorical and metonymic processes. The volume is concluded by Part IV, the three papers of which attempt to reconsider some TEFL issues from a cognitive-linguistic point of view. *Advanced Grammar in Use* Martin Hewings, 2009 *The Ultimate French Verb Review and Practice, 2nd Edition* David M.
