Answer A market maker is a firm or individual that stands ready to buy and sell securities at specified prices maintaining liquidity in the market They profit from the bid ask spread A broker on the other hand facilitates transactions between buyers and sellers and earns a commission for their services Brokers do not take on risk by holding securities in inventory
- 2 Can you explain what a limit order and a market order are
Answer A limit order is an order to buy or sell a stock at a specified price or better For a buy order it will only execute at the limit price or lower for a sell order it will only execute at the limit price or higher A market order is an order to buy or sell a stock immediately at the current market price Market orders are executed quickly but may not guarantee the exact price
- 3 How do you evaluate whether a stock is undervalued or overvalued
Answer I would evaluate the stock using a combination of fundamental analysis and technical analysis
Fundamental Analysis I would analyse key metrics such as earnings per share EPS price to earnings P E ratio price to book P B ratio debt to equity ratio and compare these with industry averages and historical performance
Technical Analysis I would look at the stock's price action moving averages support and resistance levels volume patterns and indicators like RSI and MACD to gauge momentum and trends

protect against market downturns

5 What is a short sale and when would you consider doing it
Answer A short sale is when you borrow shares of a stock and sell them at the current market price hoping to buy them back later at a lower price It is a bearish strategy used when you believe a stock's price will decline Shorting is often considered when there's strong conviction about overvaluation poor fundamentals or an expected downturn in the market or sector

6 Explain the concept of liquidity and its importance in trading
Answer Liquidity refers to how easily an asset can be bought or sold in the market without affecting its price High liquidity means that there is a large number of buy and sell orders and trades can be executed quickly at the market price Liquidity is important because it allows traders to enter and exit positions efficiently without significant price slippage

Stop losses I'd ensure that appropriate stop loss orders are in place to limit potential losses
Hedging I might recommend hedging the position with options or futures to mitigate further losses
Position reduction If the position is too large and the risk is too high I'd consider reducing the size or exiting part of the position
Communication I would communicate with the client to discuss the situation explain potential outcomes and provide suggestions

8 What technical indicators do you rely on for equity trading
Answer I rely on a combination of indicators
Moving Averages e.g. 50 day 200 day Used to identify trends and potential reversal points
RSI Relative Strength Index Helps identify overbought or oversold conditions suggesting potential reversal points
MACD Moving Average Convergence Divergence Useful for identifying momentum and trend changes
Bollinger Bands To assess volatility and overbought/oversold levels
