

LECTURE 1 - INTRODUCTION

PUBLIC SECTOR ECONOMICS:

- We can apply economics frameworks, concepts, and tools to:
 - The public sector itself - how it is organised, why it is organised that way, criteria and measures of performance, ways of improving performance
 - AND
 - What it is trying to achieve - how it goes about it, why it does it that way

MULTIPLE LAYERS OF GOVERNANCE AND MANAGEMENT:

- System level
- Central government level
- Local government level
- Institutional / company / public sector agency level
- Programme level

"SIZE" OF THE PUBLIC SECTOR:

- The public sector employed around 403,000 people (headcount) in 2018
- ... 18% of New Zealand's total workforce (2,238,000), as measured by Stats NZ's Business Demography data
- The majority (88%) work in the State sector (354,000), ... and
- ... 12% in local govt (49,200)

KEY CONCEPTS:

- Policy - focused on the choice of key outcomes ("what are we trying to achieve")
- Outcome - Ultimate aim of the policy
- Management - about deciding how those outcomes will be achieved - and actually implementing those decisions
- Output - intermediate steps that need to be completed to achieve the outcome

PUBLIC POLICY AND MANAGEMENT:

(About improving the wellbeing of citizens - now and in the future)

- Collective action ... implemented by governments at all levels (central, regional, local) ... funded through taxes, rates, levies, ... to improve the lives of individuals and communities
- Public policy and management: interface between public and private action

Handbook of Public Economics Martin Feldstein, A.J.

Auerbach, 1985-08-01 The first volume of the Handbook of Public Economics contains eight essays on various topics in Public Economics by international leaders in the field. It begins with an historical perspective on the growth of the area as a whole and subsequent essays focus on the theory and evidence about the impact of taxation on economic behavior. The material presents an up to date survey of the field of public economics by those actually doing work on the frontier of the subject and is written in a manner that renders it useful to the public finance specialist whilst remaining understandable for the student and non specialist.

Fundamentals of Public Budgeting and Finance Aman Khan, 2024-07-22 Budgeting is arguably the single most important function in government. Every year governments spend considerable sums on expenditure programs and activities as well as time preparing and executing the budget. It is therefore crucial that anyone interested in a career in public administration has a fundamental grasp of these basics. This second edition textbook integrates theory and practice of public budgeting into a single volume. The first part introduces the background to budgeting focusing especially on taxation government expenditure and revenue. The second part focuses on budgeting basics in particular operating and capital budget. The final part deals with budgeting tools especially those related to capital rationing budget forecasting and analyzing government revenue and expenditure. Written in a concise and easy to understand manner this book captures the multidimensional nature of public budgeting that both students and practitioners will find useful. This second edition has been fully revised and updated as well as expanded to include new material and exercises. It will appeal to all those studying public administration financial management and public budgeting.
