4th Sem Structural Analysis 1:

Structural Analysis-I, 4th Edition Bhavikatti S.S., Structural Analysis or the Theory of Structures is an important subject for civil engineering students who are required to analyze and design structures It is a vast field and is largely taught at the undergraduate level A few topics like Matrix Method and Plastic Analysis are also taught at the postgraduate level and in structural engineering electives The entire course has been covered in two volumes Structural Analysis I and II Structural Analysis I deals with the basics of structural analysis measurements of deflection various types of deflection loads and influence lines etc

Dilute Magnetic Semiconducting (DMS) Materials R. Saravanan,2018-08-25 Diluted Magnetic Semiconductors DMS play a vital role in modern electronics industry It is important to understand the fundamental properties of these materials in order to apply them to their full potential This book presents an analysis of the charge density distribution and other properties of some silicon and germanium based diluted magnetic semiconductors A quantitative analysis of the charge density distribution has been done in order to obtain measurements of the charges involved in the bonding which are decisive for the physical and chemical properties of the DMS materials Also the local structures of the materials have been analyzed by studying their powder X ray diffraction intensities Analysis of the magnetic properties of the DMS materials is mandatory and has been accomplished by magnetic measurements carried out using a vibrating sample magnetometer The morphology of the DMS materials has been studied using scanning electron micrographs
