through a systematic approach Its first part assesses the current taxation of cloud computing The second part evaluates whether the findings of this initial assessment conform to various superior principles of good rulemaking It identifies which of the present tax rules ought to be adapted The final part considers how the rules could be amended to become more compliant with the superior principles In this way Part I embodies the thesis Part II the antithesis and Part III seeks a synthesis   *Innovation for the 21st Century* Michael A. around it From its origins in the Cold War military industrial complex through its present day Silicon Valley proselytizers and eager policy analysts AI has never been simply a technical project enabled by larger data and better computing Drawing on intimate familiarity with the field and its practices Katz instead asks us to see how AI reinforces models of knowledge that assume white male superiority and an imperialist worldview Only by seeing the connection between artificial intelligence and whiteness can we prioritize alternatives to the conception of AI as an all encompassing technological force Bringing together theories of whiteness and race in the humanities and social sciences with a deep understanding of the history and practice of science and computing Artificial Whiteness is an incisive urgent critique of the uses of AI as a political tool to uphold social hierarchies   **Teaching Secondary Science** Keith Ross,Liz Lakin,Janet McKechnie,Jim Baker,2015-06-19 The fourth edition of Teaching Secondary Science has been fully updated and includes a wide range of new material This invaluable resource offers a new collection of sample lesson plans and includes two new chapters covering effective e learning and advice on supporting learners with English as a second language It continues as a comprehensive guide for all aspects of science teaching with a focus on understanding pupils alternative frameworks of belief the importance of developing or challenging them and the need to enable pupils to take ownership of scientific ideas This new edition supports all aspects of teaching science in a stimulating environment enabling pupils to understand their place in the world and look after it Key features include Illustrative and engaging lesson plans for use in the classroom Help for pupils to construct new scientific meanings M level support materials Advice on teaching difficult ideas in biology chemistry physics and earth sciences Education for sustainable development and understanding climate change Managing the science classroom and health and safety in the laboratory Support for talk for learning and advice on numeracy in science New chapters on e learning and supporting learners with English as a second language Presenting an environmentally sustainable global approach to science teaching this book emphasises the need to build on or challenge children s existing ideas so they better understand the world in which they live Essential reading for all students and practising science teachers this invaluable book will support those undertaking secondary science PGCE school based routes into teaching and those studying at Masters level
