history of computing important Given that the computer as we now know it came into existence less than 70 years ago it might seem a little odd to some people that we are concerned with its history Isn t history about old things Computing of course goes back much further than 70 years with many earlier vices rightly being known as computers and their history is of course important It is only the history of electronic digital computers that is relatively recent History is often justified by use of a quote from George Santayana who famously said that Those who cannot remember the past are condemned to repeat it It is arguable whether there are particular mistakes in the history of computing that we should avoid in the future but there is some circularity in this question as the only way we will know the answer to this is to study our history This book contains papers on a wide range of topics relating to the history of computing written both by historians and also by those who were involved in creating this history The papers are the result of an international conference on the History of Computing that was held as a part of the IFIP World Computer Congress in Brisbane in September 2010 Information and Communication

book is intended to help you successfully complete the test for Module 2 of the European Computer Driving Licence ECDL. However, before we start working through the actual content of the guide, you may find it useful to know a little bit more about the ECDL in general and where this particular Module fits into the overall framework. What Is The ECDL? The European Computer Driving Licence ECDL is a European wide qualification that enables people to demonstrate their competence in computer skills. It certifies the candidate's knowledge and competence in personal computer usage at a basic level and is based upon a single agreed syllabus. This syllabus covers a range of specific knowledge areas and skill sets which are broken down into seven modules. Each of the modules must be passed before the ECDL certificate can be awarded, though they may be taken in any order but must be completed within a three year period. Testing of candidates is at audited testing centres and successful completion of the test will demonstrate the holder's basic knowledge and competence in using a personal computer and common computer applications. The implementation of the ECDL in the UK is being managed by the British Computer Society. It is growing at a tremendous rate and is set to become the most widely recognised qualification in the field of work related computer use.
