Everything Forever Gevin Giorbran, 2007-11 Giorbran extends the work of David Bohm and Stephen Hawking by laying out the foundation of the timeless realm literally creating a visual model of the space of all possible states The model is then transformed into what are essentially the blueprints of the famous many worlds theory The Lost Future Jan Zielonka, 2023-02-07 A timely and compelling argument for a revitalized and restructured global politics The future seems increasingly uncertain Our democracies are failing to prevent financial crises energy shortages climate change and war so how can we look to the future with confidence Jan Zielonka argues that it is democracy's shortsightedness that makes politics stumble in our increasingly connected world With our governments still confined to the borders of nation states defending the short term interests of present day voters the consequences for future generations are dire In this incisive account Zielonka makes a bold case for a new politics of time and space He considers how democracy should adjust to the world of high speed and he questions our everyday experiences as citizens Is it acceptable for authorities and firms to monitor our whereabouts Why is the distribution of time and space so unequal And most crucially can we construct a new system of governance that will allow us to plan ahead with certainty Media Models to Foster Collective Human Coherence in the PSYCHecology Schafer, Stephen Brock, 2019-06-14 Modern populations are superficially aware of media potentials and paraphernalia but recent events have emphasized the general ignorance of the sentient media Advertising has long been suspected of cognitive manipulation but emergent issues of political hacking false news disinformation campaigns lies neuromarketing misuse of social media pervasive surveillance and cyber warfare are presently challenging the world as we know it Media Models to Foster Collective Human Coherence in the PSYCHecology is an assemblage of pioneering research on the methods and applications of video games designed as a new genre of dream analogs Highlighting topics including virtual reality personality profiling and dream structure this book is ideally designed for professionals researchers academicians psychologists psychiatrists sociologists media specialists game designers and students hoping for the creation of sustainable social patterns in the emergent reality of energy and information **Cheating the Ferryman** Anthony Peake, 2022-06-30 Peake's explanation of your immortality is the most innovative and provocative argument I have seen Bruce Greyson Carlson Professor of Psychiatry University of Virginia Is there life after death This age old question has plagued humankind from the moment we became self aware but do we now have enough evidence to answer it In this mind expanding book Anthony Peake reveals an extraordinary model of life after death one that brings together ideas from ancient philosophy neuroscience quantum physics and consciousness studies and manages to explain a number of seemingly mysterious experiences such as precognition d j vu synchronicity near death experiences and out of body experiences It is called Cheating the Ferryman This book is a much awaited follow up to Peake's internationally bestselling Is There Life After Death which introduced his revolutionary model Since then he has amassed more evidence using new studies by world

leading researchers theories from the likes of Stephen Hawking Carl Jung and Hugh Everette together with testimonies of NDEs and precognitive experiences which give everyday clues to our immortality Cheating the Ferryman presents an astounding model of survival after death that is supported by rather than in conflict with our present understanding of how the universe works
