The Cambridge History of the English Language

Richard M. Hogg,Norman Francis Blake,Roger Lass,R. W. Burchfield,1992 This volume of the

Cambridge History of the English Language covers the period 1476-1776 beginning at the time of the establishment of Caxton's first press in England and concluding with the American Declaration of Independence the notional birth of the first non-insular extraterritorial English. It encompasses three centuries which saw immense cultural change over the whole of Europe: the late middle ages, the renaissance, the reformation, the enlightenment, and the beginnings of romanticism. During this time Middle English became Early Modern English and then developed into the early stages of indisputably modern, if somewhat old-fashioned English. In this book the distinguished team of six contributors traces these developments covering orthography and punctuation, phonology and morphology, syntax, lexis and semantics, regional and social variation, and the literary language. The volume also contains a glossary of linguistic terms and an extensive bibliography.

Appositive Relative Clauses in English Rudy Loock, 2010-03-24 This book sheds new light on Appositive Relative Clauses (ARCs) a structure that is generally studied from a merely syntactic point of view in opposition to Determinative or Restrictive Relative Clauses (DRCs). In this volume ARCs are examined from a discourse/pragmatic point of view independently of DRCs in order to provide a positive definition of the structure. After a presentation of the morphosyntactic, semantic and pragmatic characteristics of ARCs, a taxonomy of their functions in discourse is established for both written and spoken English based on the results of a corpus-based investigation. Constraints are then defined within an information packaging approach to syntactic structures to show why speakers choose ARCs over other competing allostructures, i.e. syntactic structures that fulfil similar discourse functions, e.g. nominal appositives, independent clauses, adverbials, noun premodifiers, topicalization. The end result is a deeper understanding of the richness of ARCs in their natural contexts of use.
