

# Thesis Statement

---

## What is a thesis statement?

Your thesis statement serves as the main argument that drives your paper forward. It shows the emphasis of your argument and indicates its methodology. It focuses your ideas into one or two sentences. It should present the topic of your paper and also make a comment about your position in relation to the topic. Your thesis statement should tell your reader what the paper is about and also help guide your writing and keep your argument focused.

## Why does it matter?

For the writer: The thesis statement is also a good test for the scope of your intent. Writing a thesis statement tests the writer's clarity of thought. Once the writer decides on the paper's main focus, the thesis statement additionally serves as a guide to remind the writer to keep the essay focused and organized.

For the reader: The presence of a good thesis statement aids reader understanding. A well-organized essay presents a more persuasive argument. As the thesis statement announces the essay's topic, and then the body of the essay further explains and supports that topic, the thesis statement creates an expectation in the reader's mind about what will follow in the rest of the essay. When the body paragraphs fulfil this reader expectation, the paper feels well organized and the content makes sense.

**The purpose of a thesis statement depends on what kind of paper you are writing.**

Argumentative: An argumentative paper takes a position or makes an assertion or a claim and supports or justifies the position, assertion, or claim with reasons and evidence.

E.g. "Foreign aid to developing countries does not promote economic growth and social development."

Explanatory: An explanatory (expository) paper describes or explains a specific topic. An explanatory thesis statement tells your reader what it is you will explain and what aspects or parts of the topic will be considered.

E.g. "The nursing profession requires academic knowledge, interpersonal skills and psychological expertise at all stages of patient treatment."

Analytical: An analytical paper evaluates an issue or idea in an organized manner, subdividing various aspects or parts. An analytical thesis statement informs the reader of the issue/idea, identifies the aspects that you are evaluating and shows how you will organize your analyses.

E.g. "Distinguishing between various definitions of "fitness" (e.g., individual, absolute, relative), evolutionary geneticists can use fitness to predict changes in the genetic composition of populations through time."
