**Advances in Carbon Management Technologies** Subhas K. Sikdar, Frank Princiotta, 2021-01-31 Volume 2 of *Advances in Carbon Management Technologies* has 21 chapters It presents the introductory chapter again for framing the challenges that confront the proposed solutions discussed in this volume Section 4 presents various ways biomass and biomass wastes can be manipulated to provide a low carbon footprint of the generation of power heat and co products and of recovery and reuse of biomass wastes for beneficial purposes Section 5 provides potential carbon management solutions in urban and manufacturing environments This section also provides state of the art of battery technologies for the transportation sector The chapters in section 6 deals with electricity and the grid and how decarbonization can be practiced in the electricity sector The overall topic of advances in carbon management is too broad to be covered in a book of this size It was not intended to cover every possible aspect that is relevant to the topic Attempts were made however to highlight the most important issues of decarbonization from technological viewpoints Over the years carbon intensity of products and processes has decreased but the proportion of energy derived from fossil fuels has been stubbornly stuck at about 80% This has occurred despite very rapid development of renewable fuels because at the same time the use of fossil fuels has also increased Thus the challenges are truly daunting It is hoped that the technology choices provided here will show the myriad ways that solutions will evolve While policy decisions are the driving forces for technology development the book was not designed to cover policy solutions

*Regulating Foreign Direct Investment for Development* Nakib Mohammad Nasrullah, Mia Mahmudur Rahim, 2024-11-06 This book offers a comprehensive overview of the relationship between Foreign Direct Investment FDI regulation and sustainable development in Bangladesh It is widely accepted that FDI induced development is essential for the growth of undeveloped economies but it can create a conflict between the investors goal of profit maximisation and the host state s pursuit of economic gains FDI induced development is especially important for the economy of Bangladesh the focus of this book which argues that a balanced regulatory approach is necessary to ensure that FDI benefits all stakeholders In examining Bangladesh s FDI regulatory regime the authors reveal that it is

investor centric and lacks a development oriented approach They discuss the relevant laws practices mechanisms and institutions that govern the entrance regulations and incentives for foreign investment as well as the protection of the environment and human rights with special attention to labour rights involuntary displacement and the protection of both the investors and the state in which they invest From this analysis the book recommends reforms to introduce development as a primary goal while maintaining Bangladesh s appeal as an FDI destination The book will be of interest to researchers students and academics in the fields of economics politics sustainable development and economic growth It will also be of great interest to FDI strategists policymakers negotiators administrators and legislators in creating a balanced regulatory regime to attract FDIs for development

**Concentrating Solar Power in Developing Countries** Natalia Kulichenko,Jens Wirth,2012-07-13 At present different concentrating solar thermal technologies CST have reached varying degrees of commercial availability This emerging nature of CST means that there are market and technical impediments to accelerating its acceptance including cost competitiveness an understanding of technology capability and limitations intermittency and benefits of electricity storage Many developed and some developing countries are currently working to address these barriers in order to scale up CST based power generation Given the considerable growth of CST development in several World Bank Group partner countries there is a need to assess the recent experience of developed countries in designing and implementing regulatory frameworks and draw lesson that could facilitate the deployment of CST technologies in developing countries Merely replicating developed countries schemes in the context of a developing country may not generate the desired outcomes Against this background this report a analyzes and draws lessons from the efforts of some developed countries and adapts them to the characteristics of developing economies b assesses the cost reduction potential and economic and financial affordability of various CST technologies in emerging markets c evaluates the potential for cost reduction and associated economic benefits derived from local manufacturing and d suggests ways to tailor bidding models and practices bid selection criteria and structures for power purchase agreements PPAs for CST projects in developing market conditions

**Energy in Australia** Graham Palmer,2013-11-09 With rapidly declining costs and seemingly unlimited sunshine the choice of solar in Australia seems obvious Yet despite its many advantages homes with solar remain completely dependent on the electricity grid for reliable supply which in Australia implies mostly coal fired generation Indeed even countries that have invested heavily in solar such as Spain and Germany have been unable to deflect the trajectory of fossil fuel dependence The reasons for this apparent paradox are varied and this book provides a deeper and more nuanced understanding of the practical applications of photovoltaics PV in modern electricity systems While the conventional life cycle assessment LCA boundaries as prescribed by the IEA PVPS provide a consistent methodology for comparing evolving PV technologies the narrow boundaries exclude many critical downstream energy costs Similarly simple cost comparisons of PV versus conventional power sources overlook the significant economic and energy costs of intermittency and grid integration

Yet distributed storage which could provide potentially valuable network support is frequently given a low priority by advocates of solar Treating PV as an extension of rather than as a substitute for the fossil fuel enterprise enables a more productive discussion of PV s potential role in electricity generation The sunburnt country of Australia which has a modern electricity system is an ideal case study for exploring the potential of solar PV With a focus on rooftop solar energy storage grid integration and electricity system issues Energy in Australia offers valuable insights into the practical challenges of solar power Although many national economies are already confronting a downward trend in energy return on investment EROI of oil and gas from both conventional and unconventional sources the large scale deployment of low emission energy sources that lie below a critical minimum EROI threshold may ultimately prove counter productive

**Smart Grid , Distributed Renewable Energies for Off-Grid Communities** Nasir El Bassam,Preben Maegaard,Marcia Schlichting,2013 It is estimated that more than two billion people worldwide lack access to modern energy resources Renewable energy has the potential to bring power to these many communities and individuals who function off the grid This book describes the latest advances in distributed and off grid renewable energy technologies and offers strategies and guidelines for planning and implementation of sustainable decentralized energy supply Coverage includes wind solar geothermal and biomass systems planning and integration economic assessment models and the role of legislative structures Back Cover

**Stakeholders, Sustainable Development Policies and the Coal Mining Industry** Izabela Jonek-Kowalska,Radosław Wolniak,Oksana A. Marinina,Tatyana V. Ponomarenko,2022-03-29 This book identifies the impact of internal and external stakeholders on the implementation of sustainable development policies in the coal mining sector in Europe and the Commonwealth of Independent States The book assesses what activities and conditions need to be improved so that sustainable development policies can be more effectively and efficiently implemented With a specific focus on the hard coal and lignite mining sectors it examines a broad range of case studies from Eastern European countries and the Commonwealth of Independent States including Russia Ukraine Poland Kazakhstan Germany Spain France and the United Kingdom among many more Beginning with an introduction to sustainable development and stakeholder theory Part II then examines internal stakeholders including owners managers employees and trade unions Part III examines external stakeholders touching upon those directly related to the mining industry such as customers and mining enterprises and those not directly associated such as local and regional communities and environmental organisations The book concludes by proposing a model approach to the management of stakeholders involved in mining enterprises focusing on improving the process of implementing sustainable development in the mining sector and strengthening the effects of this process This book will be of great interest to students and scholars of the extractive industries natural resource management and policy and sustainable development
