*Bioactive Components of Milk* Zsuzsanna Bosze, 2007-12-26 Dairy foods have huge potential concerning functional foods. Therefore there is a tremendous amount of interest in value added milk products and the identification of components in food which have health benefits. This book provides an overview of these derived components and their diverse activities including the stimulation of beneficial microflora alerting the immune system to the presence of potential pathogens and allergens binding and eliminating toxins etc. *Bioactive Components in Milk and Dairy Products* Young W. Park, 2009-06-30 Although bioactive compounds in milk and dairy products have been extensively studied during the last few decades especially in human and bovine milks and some dairy products very few publications on this topic are available especially in other dairy species milk and their processed dairy products. Also little is available in the areas of bioactive and nutraceutical compounds in bovine and human milks while books on other mammalian species are non-existent. *Bioactive Components in Milk and Dairy Products* extensively covers the bioactive components in milk and dairy products of many dairy species including cows, goats, buffalo, sheep, horse, camel and other minor species. Park has assembled a group of internationally reputed scientists in the forefront of functional milk and dairy products food science and technology as contributors to this unique book. Coverage for each of the various dairy species includes bioactive proteins and peptides, bioactive lipid components, oligosaccharides, growth factors and other minor bioactive compounds such as minerals, vitamins, hormones and nucleotides etc. Bioactive components are discussed for manufactured dairy products such as caseins, caseinates and cheeses, yogurt products, koumiss and kefir and whey products. Aimed at food scientists, food technologists, dairy manufacturers, nutritionists, nutraceutical and functional foods specialists, allergy specialists, biotechnologists, medical and health professionals and upper level students and faculty in dairy and food sciences and nutrition. *Bioactive Components in Milk and Dairy Products* is an important resource for those who are seeking nutritional health and therapeutic values or product technology information on milk and dairy products from the dairy cow and species beyond. Areas featured are: Unique coverage of bioactive compounds in milks of the dairy cow and minor species including goat, sheep, buffalo, camel and mare. Identifies bioactive components and their analytical isolation methods in manufactured dairy products such as caseins, caseinates and cheeses, yogurt products, koumiss and kefir and whey products. Essential for professionals as well as biotechnology researchers specializing in functional foods, nutraceuticals, probiotics and prebiotics. Contributed chapters from a team of world renowned expert scientists. *Bioactive Components in Milk* Zsuzsanna Bosze, 2020 **Bioactive Components of Human Milk** David S. Newburg, 2012-12-06 The major emphasis in this book is a compilation and definition of what is known about components of human milk including glycoconjugates that inhibit common pathogens of the infant. Also discussed are other bioactive constituents whose relevant biological roles are also beginning to be defined. Hormonal and cytokine activity, immunomodulating and autoinflammatory agents, xenobiotics and conditionally essential nutrients in milk could have roles in the protection of the infant but may also

participate in digestive processes maternal infant communication maturation of the gut central nervous system and other components of infant growth and development Like the protective activities these are discussed in terms of their presence in milk structures potential functions and structure function relationship Components whose role is nutritional support during early development of the infant are also included *Bioactive Components of Milk* K.
