Explore core JavaScript syntax and data types. Investigate often-confusing concepts such as weak typing and closures. Use object-oriented programming the JavaScript way. See what changes come from ECMAScript 5. Perform dynamic content updates using DOM methods. Handle user-generated events with modern event models. Modernize form handling with HTML5 and JavaScript. Use the XMLHttpRequest object to create Ajax applications. Control animation and multimedia content with JavaScript. Generate bitmap graphics with the Canvas API. Learn methods to handle the challenges of cross-browser coding. Discover defensive development and error handling.

[JavaScript: The Missing Manual](#) David Sawyer McFarland, 2008-07-21. JavaScript is an essential language for creating modern interactive websites, but its complex rules challenge even the most experienced web designers. With JavaScript: The Missing Manual, you'll quickly learn how to use JavaScript in sophisticated ways without pain or frustration, even if you have little or no programming experience. JavaScript expert David McFarland first teaches you the basics by having you build a simple program. Then you'll learn how to work with jQuery, a popular library of pre-built JavaScript components that's free and easy to use. With jQuery, you can quickly build modern interactive web pages without having to script everything from scratch. Learn how to add scripts to a web page, store

and manipulate information communicate with the browser window respond to events like mouse clicks and form submissions and identify and modify HTML Get real world examples of JavaScript in action Learn to build pop up navigation bars enhance HTML tables create an interactive photo gallery and make web forms more usable Create interesting user interfaces with tabbed panels accordion panels and pop up dialog boxes Learn to avoid the ten most common errors new programmers make and how to find and fix bugs Use JavaScript with Ajax to communicate with a server so that your web pages can receive information without having to reload

Single Page Web Applications Michael Mikowski, Josh C. Powell, 2013-09-30 Code for most web sites mostly runs on the server When a user clicks on a link the site reacts slowly because the browser sends information to the server and the server sends it back again before displaying the results With near universal availability of capable browsers and powerful hardware the single page web application SPA pushes most of the code to the browser giving users immediate results whether they're surfing at their desk or using a phone app Single Page Web Applications shows how to build modern browser based apps that take advantage of stronger client platforms and more predictable bandwidth It covers the SPA design approach and explores new techniques like structured JavaScript and responsive design Readers will learn to capitalize on trends like server side JavaScript and NoSQL data stores as well as new frameworks that make JavaScript more manageable and testable as a first class language

AUDIENCE This book is for web developers architects and product managers who know about JavaScript HTML CSS and web development basics
