

Cloud Computing Checklist: How Secure Is Your Cloud?

OVERVIEW

Cloud computing differs from traditional outsourcing in that the latter model is still very much about standards compliance — either you take your server and put it in someone else's data center or you lease a service provider and manage your clients. You know exactly where your data lives and what operations it goes through with others. Cloud computing decouples data from infrastructure and resources into logical operational blocks, both so where your data is and how it's replicated, which rarely used in traditional IT outsourcing, multiplicity is almost a given in cloud computing services. These differences give rise to a unique set of security and privacy issues that not only impact your risk management practices but have also stimulated a fresh evaluation of legal issues in areas such as compliance, auditing, and discovery.

If your organization is interested in cloud computing, there are the kinds of issues you need to broach with the service provider. To help with this process, we have put together a checklist of key issues and concerns. When evaluating the different services available, be sure to ask the following questions.

Area	Topic	Specific concerns	Answer
Security and privacy	Data protection	<p>Data segregation</p> <p>How do you separate my data from other customers' data?</p> <p>Data at rest protection</p> <p>Where do you store my data?</p> <p>How strong is your encryption and data integrity?</p> <p>What kind of authentication and access control procedures are in place?</p> <p>(Documentation for auditors)</p> <p>Data in-motion protection</p> <p>How do you get data from me to you?</p> <p>How do you transfer data from one place to another?</p> <p>What are your data loss prevention capabilities (if applicable)?</p> <p>Can any third-party (not service providers) access my data, and if so, how?</p>	<p>Different databases / segregation of duties .</p> <p>Private / public cloud</p> <p>Read , write , delete</p> <p>Porting , migration</p> <p>DLP software</p> <p>Yes by access controls and approvals</p>
