

# Comparison Table: Cloud Computing vs Traditional Computing

Function	Cloud Computing	Traditional Computing
Business model	Pay for use (subscription model), administrative overhead is reduced	Pay for assets, administrative costs
Concept	Delivery of different services such as data and applications though internet on different servers	Delivery of different services on local server
Data access	Ability to access data anywhere at any time by end user	User can access data only on system in which it is stored
Costs	Most cost effective as operations and maintenance of server is shared among several parties which reduces cost of public services	Less cost effective as one has to buy expensive equipment to operate and maintain server
Connectivity	Requires fast, reliable, and stable Internet connection to access data and application	Does not require Internet connectivity to access data or application
Scalability and Elasticity	It is highly scalable and elastic one can increase or decrease computing resources as per business need	Scalability and elasticity are dependent on hardware, architecture and there is a limit to scope of expansion
Resiliency and redundancy	Resiliency and redundancy are built in by cloud providers	Resiliency and redundancy levels depend on architecture, additional costs are involved to built a high resiliency architecture
