90 papers presented at the 3rd IFAC Symposium on Modelling and Control in Biomedical Systems held in Warwick UK from 23-26 March 1997. Significant work in the field of biomedical systems analysis and design is taking place throughout the world and the opportunities for technological interchanges offered by symposia like this one are extremely valuable for the progress and stability of effort and vision in this important human centred field. The symposium was multi and interdisciplinary in nature with the choice of topics solicited covering the major systems components and functions of complex physiology. The remit was also extended on this occasion beyond mammalian physiology to that of biological systems. Therefore a special session was devoted to the modelling and control of botanical systems with the aim of providing an exchange of ideas with biomathematicians.
