The study of the biological aspect of past populations is in constant development through the application and improvement of methodologies besides the discoveries of new (fossil) human remains. It is worth noticing that, in the last decades, technological advances and multidisciplinary approaches applied to biological anthropology have allowed us to increase our knowledge of human evolution and migration. In this context, the UISPP commission “Biological Anthropology” proposes a session that embraces all the anthropological fields to maximize the participation of anthropologists from different horizons to stimulate debates and arouse curiosity. In this broad range of topics, a special focus will be given to anthropological studies of Europe’s prehistoric populations and migrations from the first peopling until the most recent times.

In this sense, we highly encourage graduate students and junior researchers to present their current research to update the anthropologists’ community about the latest news and discoveries in the anthropological sciences.

Authors can send oral or poster proposals on a broad range of chronological, geographic, theoretical, or methodological topics. The session might be subdivided into sub-sessions according to the different topics proposed by the authors.

The session will be organized only in presence. The deadline for the communication proposal has been fixed to **15/05/2023**. Abstracts must be submitted directly on the congress website: <https://uispp2023.unct.ro/> (top right of the home page).

For any further information regarding the session, please send an email to [julie.arnaud@unife.it](mailto:julie.arnaud@unife.it).
