open to instant adoption of new beliefs In this unique book he looks at the neurobiology of this spontaneous change why the events occur how to defend against the negative among them and how to manage or promote positive SIEs He also explains through common vignettes how and why the brain encodes SIEs to be triggered again and again in memory at later dates Finally Rousell details how we can recognize Elevated Suggestibility States or teachable moments then use that knowledge to create positive SIEs for ourselves and those we love And he explains how we can undo the damage of negative SIEs that may be haunting us holding us back or hurting us
