Language in Focus Kasia Papaja, Katarzyna Papaja, 2016-12-14 Applied Linguistics is a field of academic enquiry that deals with the theoretical and empirical investigation of real issues which focus on language. These issues include aspects of linguistics first or second language acquisition literacy language disorders foreign language learning and teaching bilingual education linguistic discrimination and language policy among others. New approaches, new theoretical concepts and new methods are a prerequisite for dealing with particular educational issues and as such this book focuses on the challenges and opportunities that emerge from this. It brings together selected presentations given at the LIF2014 conference which took place in Antalya, Turkey. The main focus of this event was to reflect the internationality of the English language by drawing academicians, researchers, teachers and educational authorities from all over the world and providing them with the opportunity to exchange an interdisciplinary dialogue on the theoretical as well as purely practical implications of Applied Linguistics and ELT.
