Basic One- and Two-dimensional NMR Spectroscopy. (Ein- und Zweidimensionale NMR-Spektroskopie). 2., Enl. Ed Horst Friebolin, 1993 *Two-dimensional NMR Spectroscopy*

William R. Croasmun, Robert M. K. Carlson, 1994 One and Two Dimensional NMR Spectroscopy Atta-ur- Rahman, 1989-04

The field of nuclear magnetic resonance spectroscopy has undergone explosive development during the last decade with the advent of new one and two dimensional techniques The author has had extensive experience in the use of these techniques for the structure elucidation of complex natural products and in this book he gives a comprehensive up to date and very readable account of these developments The book s scope is very wide It starts from fundamental principles of modern NMR spectroscopy describing the instrumentation and its optimum use and extends to the latest developments such as inverse measurements Emphasis is on problem solving so as to be useful to a large number of organic chemists biochemists and medicinal chemists The problems and worked solutions at the end of the chapters will help students to gain proficiency in the application of these new techniques Those who are learning how to operate modern NMR spectrometers will find particularly useful the description of such basic aspects as shimming probe tuning and methods for improvement of resolution and sensitivity

Bioactive Natural Products Steven M. Colegate, Russell J. Molyneux, 2007-12-14 Following the successful format of the original this new edition presents applications of the most recent techniques for the detection isolation and structural determination of bioactive natural products It features new case studies and illustrations that demonstrate applications of techniques covered in the book Complementing as much as replacing the first edition most of the contributors are new The text includes updates on chemical extraction and NMR based structure determination and new contributions on liquid chromatography linked with mass and NMR spectroscopy dereplication approaches assessment of source material for natural products and novel bioassay development
