How to Study Public Life Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best design public infrastructure vital to cities for

getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide

Resilient Cities, Second Edition Peter Newman, Timothy Beatley, Heather Boyer, 2017-06-01 What does it mean to be a resilient city in the age of a changing climate and growing inequity As urban populations grow how do we create efficient transportation systems access to healthy green space and lower carbon buildings for all citizens Peter Newman Timothy Beatley and Heather Boyer respond to these questions in the revised and updated edition of *Resilient Cities* Since the first edition was published in 2009 interest in resilience has surged in part due to increasingly frequent and deadly natural disasters and in part due to the contribution of our cities to climate change The number of new initiatives and approaches from citizens and all levels of government show the promise as well as the challenges of creating cities that are truly resilient The authors hopeful approach to creating cities that are not only resilient

but striving to become regenerative is now organized around their characteristics of a resilient city A resilient city is one that uses renewable and distributed energy has an efficient and regenerative metabolism offers inclusive and healthy places fosters biophilic and naturally adaptive systems is invested in disaster preparedness and is designed around efficient urban fabrics that allow for sustainable mobility Resilient Cities Second Edition reveals how the resilient city characteristics have been achieved in communities around the globe The authors offer stories insights and inspiration for urban planners policymakers and professionals interested in creating more sustainable equitable and eventually regenerative cities Most importantly the book is about overcoming fear and generating hope in our cities Cities will need to claim a different future that helps us regenerate the whole planet this is the challenge of resilient cities [Key Thinkers on Cities](#) Regan Koch, Alan Latham, 2017-05-22 Key Thinkers on Cities provides an engaging introduction to the dynamic intellectual field of urban studies It profiles the work of 40 innovative thinkers who represent the broad reach of contemporary urban scholarship and whose ideas have shaped the way cities around the world are understood researched debated and acted upon Providing a synoptic overview that spans a wide range of academic and professional disciplines theoretical perspectives and methodological approaches the entry for each key thinker comprises A succinct introduction and overview Intellectual biography and research focus An explication of key ideas Contributions to urban studies The book offers a fresh look at well known thinkers who have been foundational to urban scholarship including Jane Jacobs Henri Lefebvre Manuel Castells and David Harvey It also incorporates those who have helped to bring a concern for cities to more widespread audiences such as Jan Gehl Mike Davis and Enrique Pe alosa Notably the book also includes a range of thinkers who have more recently begun to shape the study of cities through engagements with art architecture computer modelling ethnography public health post colonial theory and more With an introduction that provides a mapping of the current transdisciplinary field and individual entries by those currently involved in cutting edge urban research in the Global North and South this book promises to be an essential text for anyone interested in the study of cities and urban life It will be of use to those in the fields of anthropology economics geography sociology and urban planning **Fundamentals of Sustainable Urban Design** Avi Friedman, 2020-12-10 This book begins with an introduction describing current societal transformations that merit new urban designs including depletion of non renewable natural resources elevated levels of greenhouse gas emissions large numbers of aging Baby Boomers and climate change Dr Friedman then examines these challenges through thirty chapters of interest to urban designers architects civil and construction engineers and town planners Each of these topics represents an aspect of urban design and describes an innovative solution and offers a detailed description of underlying principles The highly illustrated text presents innovative urban design strategies based on sustainable principles Integrated with each chapter are several international case studies illustrating design implementations [Cities for People](#) Jan Gehl, 2013 **Historic Cities** Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a

selection of seminal writings on the conservation of historic cities This book the eighth in the Getty Conservation Institute's Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

Life Between Buildings Jan Gehl, 2011-01-17 The first Danish language version of this book published in 1971 was very much a protest against the functionalistic principles for planning cities and residential areas that prevailed during that period The book carried an appeal to show concern for the people who were to move about between buildings and it urged an understanding of the subtle almost indefinable but definite qualities which have always related to the interaction of people in public spaces and it pointed to the life between buildings as a dimension of architecture that needs to be carefully treated Now 40 years later many architectural trends and ideologies have passed by over the years These intervening years have also shown that the liveliness and liveability of cities and residential areas continues to be an important issue The intensity in which fine public spaces are used at this point in time as well as the greatly increased general interest in the quality of cities and their public spaces emphasises this point The character of life between buildings changes with changes in any given social context but the essential principles and quality criteria to be employed when working with life between buildings has proven to be remarkably constant Though this work over the years has been updated and revised several times this version bears little resemblance with the very early versions however there was no reason to change the basic message Take good care of the life between your buildings

People Cities Annie Matan, Peter Newman, 2016-11-15 A good city is like a good party you stay for longer than you plan says Danish architect Jan Gehl He believes that good architecture is not about form but about the interaction between form and life Over the last 50 years Gehl has changed the way that we think about architecture and city planning moving from the Modernist separation of uses to a human scale approach inviting people to use their cities At a time when growing numbers are populating cities planning urban spaces to be humane safe and open to all is ever more critical With the help of Jan Gehl we can all become advocates for human scale design Jan's research theories and strategies have been helping cities to reclaim their public space and recover from the great post WWII car invasion His work has influenced public space improvements in over 50 global cities

including New York London Moscow Copenhagen Melbourne Sydney and the authors hometown of Perth While much has been written by Jan Gehl about his approach and by others about his influence this book tells the inside story of how he learned to study urban spaces and implement his people centered approach People Cities discusses the work theory life and influence of Jan Gehl from the perspective of those who have worked with him across the globe Authors Matan and Newman celebrate Jan s role in changing the urban planning paradigm from an abstract ideological modernism to a people focused movement It is organized around the creation of that movement using key periods in Jan s working life as a structure People Cities will inspire anyone who wants to create vibrant human scale cities and understand the ideas and work of an architect who has most influenced how we should and can design cities for people

Temporary Appropriation in Cities

Alessandro Melis,Jose Antonio Lara-Hernandez,James Thompson,2019-12-12 This book conceptualises and illustrates temporary appropriation as an urban phenomenon exploring its contributions to citizenship urban social sustainability and urban health It explains how some forms of appropriation can be subversive existing in a grey area between legal and illegal activities in the city The book explores the complex and the multi scalar nature of temporary appropriation and touches on its relationship to issues such as sustainability and building re use culture inclusivity including socio spatial inclusion streetscape design homelessness and regulations controlling the use of public spaces The book focuses on temporary appropriation as a necessity of adapting human needs in a city highlighting the flexibility that is needed within urban planning and the further research that should be undertaken in this area The book utilises case studies of Auckland Algiers and Mexico City and other cities with diverse cultural and historical backgrounds to explore how planning design and development can occur whilst maintaining community diversity and resilience Since urban populations are certain to grow further this is a key topic for understanding urban dynamics and this book will be of interest to academics and practitioners alike

When We Become Strangers Maggie Hamilton,2021-02-02 We re more connected yet lonelier

than ever practical ways to combat the alarming rise of loneliness by bestselling author and social researcher Maggie Hamilton Practical solutions to combat social isolation in our families and communities A timely warning shot over our collective bows reminds us that awareness without action is worthless A thought provoking and challenging look into our future Michael Carr Gregg psychologist and bestselling author Restores hope and gives simple practical steps we can all take to feel safe and connected as we build a new way of living and turn around the estrangement we all feel Katrina Cavanaugh CEO The Kindness On Purpose Movement After decades of affluence we re now busy renovating our homes buffing and

botoxing our bodies and losing ourselves in passive entertainment and shopping as depression and anxiety soars And with the arrival of Netflix and Uber Eats there s less and less incentive to leave home Could our constant need for connection be messing with our brains Is this why we re losing our ability to strike up a conversation with anyone we don t know And given that so many of our kids lack one on one attention and regular touch are we raising this new generation to be profoundly lonely Right now many of our relationships at home and at work as well as in our communities are struggling What then are the best ways back to belonging and what might a more engaged community look like Maggie Hamilton author of *What s Happening to Our Boys* and *What s Happening to Our Girls* explores our growing loneliness and proposes practical solutions and an uplifting vision to combat the increasing social isolation in our families and communities **Main Street, California**, 2013 *Harbourscape* Hans Kib, 2007 At the urban scale the harbour is a grandiose meeting between the town and the fjord landscape representing an interesting interface between the local life and the big world Here we still have a great variety of old and new architectural typologies This scenery calls for quality The waterfront is a common gift for all citizens and it has been the gateway for hopes for a better life and a meeting place between tradition and the new In 2005 the Harbourscape Aalborg workshop and conference took place at Aalborg University with the participation of 45 architects engineers and planners from Denmark Norway the Netherlands and the United Kingdom The aim was to develop visionary strategies and design proposals emphasising the concepts of the development and regeneration of the waterfront in Aalborg This book provides a comprehensive presentation of the different methodological approaches and the resulting design concepts The aim has been to investigate a full scale dialogue on concepts and architectural quality in the waterfront development among stakeholders in this process and to illustrate how different design based methods can serve as tools in the said process Harbourscape does not provide architectural solutions to well defined problems and projects It is an eye opener towards new concepts in waterfront development and the use of design based methods in regeneration projects provided by young architects as well as more experienced designers and academics *New City Life* Jan Gehl, 2006
