Gibson, 2011-06-30 Association of Recorded Sound Collections Awards for Excellence Best Research in Record Labels Certificate of Merit 2012 The Starday Story The House That Country Music Built is the first book entirely dedicated to one of the most influential music labels of the twentieth century In addition to creating the largest bluegrass catalogue throughout the 1950s and 60s Starday was also known for its legendary rockabilly catalogue an extensive Texas honky tonk outpouring classic gospel and sacred recordings and as a Nashville independent powerhouse studio and label Written with label president and co founder Don Pierce this book traces the label s origins in 1953 through the 1968 Starday King merger Interviews with artists and their families employees and Pierce contribute to the stories behind famous hit songs including Y all Come A Satisfied Mind Why Baby Why Giddy up Go Alabam and many others Gibson s research and interviews also shed new light on the musical careers of George Jones Arlie Duff Willie Nelson Roger Miller the Stanley Brothers Cowboy Copas Red Sovine and countless other Starday artists Conversations with the children of Pappy Daily and Jack Starns provide a unique perspective on the early days of Starday and extensive interviews with Pierce offer an insider glance at the country music industry during its golden era Weathering through the storm of rock and roll and later the Nashville Sound Starday was a home to traditional country musicians and became one of the most successful independent labels in American history Ultimately The Starday Story is the definitive record of a country music label that played an integral role in preserving our nation s musical heritage

Multi-objective Design Of Antennas Using Surrogate Models Slawomir Koziel, Adrian Bekasiewicz, 2016-11-18 This book addresses computationally efficient multi objective optimization of antenna structures using variable fidelity electromagnetic simulations surrogate modeling techniques and design space reduction methods Based on contemporary research it formulates multi objective design tasks highlights related challenges in the context of antenna design and discusses solution approaches Specific focus is on providing methodologies for handling computationally expensive simulation models of antenna structures in the sense of their multi objective optimization Also given is a summary of recent developments in antenna design optimization using variable fidelity simulation models Numerous examples of real world antenna design problems are provided along with discussions and recommendations for the readers interested in applying the considered methods in their design work Written with researchers and students in mind topics covered can also be applied across a broad spectrum of aeronautical mechanical electrical biomedical and civil engineering It is of particular interest to those dealing with optimization computationally expensive design tasks and simulation driven design

User Interface Design and Evaluation Debbie Stone, Caroline Jarrett, Mark Woodroffe, Shailey Minocha, 2005-04-29 User Interface Design and Evaluation provides an overview of the user centered design field It illustrates the benefits of a user centered approach to the design of software computer systems and websites The book provides clear and practical discussions of requirements gathering developing

interaction design from user requirements and user interface evaluation The book s coverage includes established HCI topics for example visibility affordance feedback metaphors mental models and the like combined with practical guidelines for contemporary designs and current trends which makes for a winning combination It provides a clear presentation of ideas illustrations of concepts using real world applications This book will help readers develop all the skills necessary for iterative user centered design and provides a firm foundation for user interface design and evaluation on which to build It is ideal for seasoned professionals in user interface design and usability engineering looking for new tools with which to expand their knowledge new people who enter the HCI field with no prior educational experience and software developers web application developers and information appliance designers who need to know more about interaction design and evaluation Co published by the Open University UK Covers the design of graphical user interfaces web sites and interfaces for embedded systems Full color production with activities projects hundreds of illustrations and industrial applications

Simulation-based Optimization Of Antenna Arrays Slawomir Koziel,Stanislav Ogurtsov,2019-02-13 The book addresses surrogate assisted design of antenna arrays in particular how surrogate models both data driven and physics based can be utilized to expedite procedures such as parametric optimization design closure statistical analysis or fault detection Algorithms and design frameworks are illustrated using a large variety of examples including real world printed circuit antenna and antenna array structures This unique compendium contains introductory materials concerning numerical optimization both conventional gradient based and derivative free including metaheuristics and surrogate based as well as a considerable selection of customized procedures developed specifically to handle antenna array problems Recommendations concerning practical aspects of surrogate assisted multi objective antenna optimization are also given The methods presented allow for cost efficient handling of antenna array design problems involving CPU intensive EM models in the context of design optimization and statistical analysis which will benefit both researchers designers and graduate students
